NEWS ITEMS CONDENSED

Charitable young ladies of Salem, Ohio, raised \$20,000 for the hospital by selling kisses at one dollar each. Yet some still argue that woman's sphere of influence is in the home.

For the second time in the history of the Montreal post office the dead body of an infant was received through the mails when a parcel collected Thursday from one of the drop boxes throughout the city was brought to the general post office.

Half a million dollars' worth of furs have been brought from Athabasca Landing to Edmonton by representatives of the Hudson Bay company, Northern Trading company and the North West Fur company.

James Carruthers, grain merchant, Montreal, says the western grain crop will total 200,000,000 bushels wheat, 210,000,000 bushels oats, 50,000,000 bushels barley and 16,000,000 bushels flaxseed. Canada will have the finest crop in her history.

Men working on the new dormitory building at the Royal Military College grounds claim to have sighted a "sea serpent" in the harbor between four and five o'clock on Friday afternoon. For some time thirty of them watched the performance of the big fish, which they say swam against the sea between Point Frederick and the city. The last seen of it was when a small steamer approached it when entering the harbor. The "serpent" showed itself above the water many times. It may have been the same one that was seen from the steamer America at the head of Wolfe Island last week. —Kingston Whig.

Monday evening the city of Belleville was visited by a fire which did damage amounting to between \$15,000 and \$20,000. The following buildings were destroyed: Queen's hotel barns and stables, James Owens' livery, drive sheds, barns and all contents; David Phillips, second-hand dealer, contents of shop, and furnishings of house and barn; Robert A. Adams, temperance house and barns, totally destroyed with much of contents, boarders belongings; Elias Ruttan, blacksmith shop damaged, sheds burned; Robinson and Hudgins, house and contents damaged by fire, water and smoke, sheds burned.

TOWN COUNCIL

Council Chamber
Sept. 2nd

Council met in special session Tuesday evening at the call of Steacy for the transaction of business.

Present—Mayor Steacy in the Reeve Osborne and Councillors ander, Walters, Simpson and G. A communication was read from T. Harshaw re insurance on town. Referred to the Town Planning Committee to secure a new police station for the town alone.

Mr. Geo. C. Wright certified accuracy of the account of Mc & Birch, of Kingston, namely \$8,000. Ordered paid.

Moved by Coun. Walters, seconded by Coun. Graham, that Mr. E. nightwatch, be given the usual weeks' holidays, and that Mr. Bruton be employed during absence. Carried.

The Finance Committee reported that Mr. Bartels, of Kingston, signified his intention to take town's bond issue of about \$30,000 the price named in the given him a short time ago.

Moved by Coun. Walters, seconded by Coun. Alexander, that the Property Committee be authorized to obtain corrugated roofing to be the new implement store house rear of the fire hall. Carried.

Mr. Geo. C. Wright, ex-Kingston, Dr. Cowan, Medical Officer, and Mr. Harvey, cont. addressed the council on matters relating to the condition of the sewer.

Coun. Walters reported to the council that G. T. R. trains were a nuisance and a dangerous proposition by blocking Thomas street and street crossing with freight trains a longer period than was all according to law. Now that has again opened the blocking Thomas street crossing is particularly dangerous, as children going from school are liable to become patient and attempt to crawl underneath the cars, and some unfortunate accident will occur.

Moved by Coun. Walters, seconded by Reeve Osborne, that the notify the proper G.T.R. officials to make a strong complaint against freight crews blocking the Thomas street crossings for a longer period than is permissible statutes in this respect. Carried.

TOWN COUNCIL.

Council Chamber,
Sept. 2nd, 1913

Council met in special session on Tuesday evening at the call of Mayor Osborne for the transaction of general business.

Mayor Steacy in the chair, Messrs. Osborne and Councillors Alex. Walters, Simpson and Graham. Communication was read from A. Shaw re insurance on town hall. Resolved to the Town Property Committee to secure a new policy on town hall alone.

Resolved by Council, that the Mayor be authorized to certify to the Mayor of Kingston, namely \$1379.84, for the same.

Resolved by Council, that Mr. E. Perry, Mayor of Kingston, be given the usual two holidays, and that Mr. Chas. be employed during his absence. Carried.

Finance Committee reported that Mr. Bartels, of Kingston, had his intention to take up the bond issue of about \$31,000 at a price named in the option in a short time ago.

Resolved by Council, that the Town Property Committee be authorized to authorize the building of a new store house at the fire hall. Carried.

Resolved by Council, that Mr. C. Wright, engineer, and Dr. Cowan, Medical Health Officer, be authorized to employ the council on matters pertaining to the condition of the outfall.

Resolved by Council, that the council be authorized to create a new and dangerous practice, by crossing with freight trains for a period than was allowable under law. Now that school is opened the blocking of the street crossing is particularly dangerous, as children going to and from school are liable to become involved and attempt to crawl through beneath the cars, and some day an accident will occur.

Resolved by Council, that the clerk of the proper G.T.R. officials and a strong complaint against crews blocking the Thomas street crossings for a long period than is permissible by the law in this respect. Carried.

DESERONTO ROAD.

Threshing is the order of the day. Mr. McFarland has been doing most of the work on this road this year, completing as high as three and four jobs in one day.

Grain seems to be turning out well from the amount sown.

Labor Day was generally observed, as usual, by the farmers working away.

The Public Schools have re-opened for the fall term and we understand the same teachers are at the helm as before.

Mr. Robert Rennie has sold thirty head of fat cattle to Mr. Buff Whitton of Deseronto, who shipped them to Toronto on Monday. Mr. Rennie is an enterprising farmer, and this year he has over thirty acres of ensilage corn, which is looking fine, more than enough to fill his two big silos.

The trustees of the upper school have been fixing up some during the vacation, having torn down the old wood house from the front of the building and built a new one at the rear, which looks fine since receiving a new coat of paint.

BELL ROCK.

There was a good attendance here on the 28th ultimo. The music given by the Enterprise Band was highly appreciated by those present. Several fine selections were sung by the Verona choir.

Our popular teacher, Miss Laura Phillips has returned to her school.

Miss Oliva Sanborn has taken charge of the Union School near First Lake.

Warren Percy and Alfred Grant have returned to Sydenham High School.

C. Shay is on the sick list, he is improving under the care of Dr. Geddes, of Verona.

Roy Moir has improved his residence by a new coat of paint.

M. Percy is adorning his house with new windows.

Visitors: Mr. and Mrs. F. L. Amey, Selby, at D. L. Amey's; Miss, Bessie Clow, Parham at E. James'; Mr. and Mrs. Fraser, Boston, Mass., at Roy Moir's; Mr. and Mrs. W. Roach, Cuba N. Y., at Mrs. A. Fallon's; Rev. and Mrs. M. Benn, Toronto, at Sydney Grant's; M. Corkey, Kingston, H. Asselstine, Miss Hazel Asselstine and Miss Ida Walroth, Verona, at W. Brook's; Miss Maggie Furlong, Berlin, Ont., at J. Timmon's.

Loaded Shells, Eley's, Sovereign, Arrow, U. M. C. all the best makes at BOYLE & SON'S.

DENBIGH.

Mrs. A. Fritsch who enjoyed a month visiting with Rev. and Mrs. Reble at Linwood and with former neighbors in Berlin, Ont. has arrived home.

Mr. E. Wagar of Richmond, one of our former most popular School Leaders and his wife, Mr. Asselstine spent

BEAVER BOARD

Artistic, Durable and Economical Walls and Ceilings Can be Made of
BEAVER BOARD

IT is made entirely of selected woods, reduced to fibrous form and pressed into panels of uniform thickness, with pebbled surface that allows wide scope to decoration with flat oil-paint in tinting, stenciling, hand-painting, etc.

DENBIGH.

Mrs. A. Fritsch who enjoyed a
month visiting with Rev. and Mrs.
Reble at Linwood and with former
neighbors in Berlin, Ont. has arrived
home.

Mr. E. Wagar of Richmond, one of
our former most popular School Lead-
ers and his uncle, Mr. Asseltine spent
a few days here calling on old friends.

Mr. Frederick and Miss Skuce of
Berry's Bay, were for a few days the
guests of Mr. and Mrs. A. Fritsch.

Mr. Geo. Fritsch of Renfrew, is also
enjoying a visit at his old home.

Miss Martha Berger, Toronto, is the
guest of Mr. and Mrs. J. Rahm.

Mrs. and Miss Powell, Kingston,
have spent a few days with Mr. and
Mrs. E. Sallans.

Mr. Chas. Both has returned home
from Ottawa where he attended the
sessions of the High Court of the
Independent Order of Foresters as
Delegate from our Local Court.

Miss Katie Marguardt who spent
the summer vacation with her parents
Mr. and Mrs. E. Marguardt has re-
turned to Little Ireland to resume her
duties as teacher in the Public School
there. Her sister Emma of Buffalo,
N. Y., who also spent a month here
left again for the city.

Rev. and Mrs. J. R. Butler of Cavan
who enjoyed three weeks vacation
with their relatives and many friends
here, returned to their present field
of labor.

Mr. G. M. Merkel, Ottawa, has ar-
rived to join Mrs. Merkel, who with
her little daughter and sister Emma
Stein are welcome guests of Mr. and
Mrs. C. Stein of the Denbigh House
and of their numerous relatives here.

The young people in this vicinity
have lately enjoyed quite a number
of dances and other amusements,
which will now cease as quite a num-
ber of them were visitors who have
returned or intend to return soon to
their employments, or places of resi-
dence.

Among those who lately left: Mr.
and Mrs. John R. Briely returned to
Osvego, N. Y.; Mr. and Mrs. Wm.
McGuinness and Alfred "Oskar
Kastner" John to Belleville; Gustav
John, A. Ready and Willie Glaeser to
New Ontario; and Adolph Rahm to
Arnprior.

Two Auto loads of guesets of the
popular Summer Resort Bon Echo
Inn favored our village with a call on
Monday last.

Mrs. (Dr.) J. Adams is enjoying a
few weeks visiting relatives and
friends in Kingston and vicinity.

Rev. and Mrs. E. Goman left on
Friday last for Rankin where he is to
assist the local Minister to conduct
some missionary services.

PURITY and QUALITY

These two essentials explain the great increase in demand for our bread since the installation of our new electrical bread mixer.

We have now a thoroughly up-to-date and sanitary bread plant, including bread mixer, sanitary steel troughs, etc. As a result we are able to place before the public a pure, clean wholesome, smooth-grained loaf of bread.

We ask all housewives who desire purity and quality in their bread to try a loaf of this bread and be convinced of its superiority.

City Dairy Pure Ice Cream

The Cream that advertises itself. Also served in bulk and bricks in our cool, clean parlor.

TUESDAY.

Lieut. Sansever and Sapper Laforques were killed Monday at Villa Coublay, France, while making an aeroplane flight.

His mount stumbling in the third race at Hillcrest Park, near Toronto, caused Jockey William Hall to fall from his horse and he was fatally injured.

The Masonic Grand Lodge of New Brunswick opened in St. John, N.B., yesterday. Reports show a membership of 3,320 in the fraternity in that province last December.

All hope has been abandoned of recovering the bodies of Lloyd Findlay and Harry Taylor, the two Toronto men who are thought to have been drowned in the Etobicoke Creek.

As an indication of the cordial personal relations established by U. S. Envoy Lind with President Huerta of Mexico, the President placed his private car at the disposal of Mr. Lind.

Following the partial destruction by fire of the big power plant of the Lake Superior Corporation, after the big building had been struck by lightning Monday night, 1,500 men are idle.

Because none of the Ottawa cadets smoke cigarettes is given as one reason for their steady shooting and good work at the O. R. A. meeting at Toronto by their instructor, Sergt.-Major Huggins.

Senator George Taylor, former chief Conservative whip, and Mrs. Taylor will celebrate their golden wedding at Gananoque on Sept. 10, and many of their friends from Ottawa will attend.

Michael Maybrick, the English composer, who under the name of "Stephen Adams" wrote "The Holy City" and "Nancy Lee" in the English language, died in Buxton, Eng., yesterday, aged 69.

THURSDAY.

Edward Collins, a farmer living near Kincardine, was thrown from a load of peas to the floor of his barn, and will die of a broken back.

Armstrong McCormick, aged 91, died yesterday at Kingston just two weeks after his wife passed away. They had been married 64 years.

William Becker, aged 50, was instantly killed by a Hydro-Electric wire while working at the Kuntz Brewery at Berlin, Ont., yesterday.

Arnold Moon, an East Zorra farmer, escaped uninjured when a C.P.R. express crashed into and killed one of his horses on the Dundas street crossing at Stratford.

Bernard Quaritch, the well-known London dealer in rare books, died yesterday from the effects of an illness contracted during a recent visit to the United States.

A suffragette plot to kidnap Lloyd-George, which just failed of success, has been revealed, states the London Daily Sketch. A male suffragist gave the scheme away.

Russell Clark, a fourteen-year-old newsboy of Kingston, was struck by lightning while delivering his papers and knocked down. He was unconscious for two hours, and one side of his body was paralyzed.

and suggests quotations by Canadian producers.

Motorman Arthur Armstrong was hurled to the tracks and the vestibule of his car was demolished when the street car was struck by two engines and a box car at the Charlotte street crossing in Peterboro yesterday.

Dr. Charles P. Clark, aged 50, a native, and for twenty years a resident of St. Mary's, Ont., and a graduate of Toronto Medical College, expired suddenly from heart failure while driving an auto in Buffalo.

TUESDAY.

Hon. W. T. White, Minister of Finance, returned to the capital Sunday morning from England, where he has been since early in July.

Fire chiefs of Ontario closed their three-day session at Kingston Saturday. Chief A. S. Kappelle of Stratford is the new president.

The death occurred Sunday at Port Hope of Frederic Barlow Cumberland, the former well-known ticket agent of Toronto. He was 67 years old.

The death occurred in Brantford on Saturday night of a prominent Brantford woman in the person of Mrs. Thomas Woodyatt, wife of ex-Police Magistrate Woodyatt.

That apples will be scarce this year is the prediction of several leading Canadian fruit dealers who base their forecast on information received from packers throughout Ontario.

Details of the typhoon which has raged over Japan for several days past show that it was more disastrous than first reported and that the fatalities perhaps will aggregate 1,000.

The members of the commission appointed by the Carnegie International peace endowment to investigate the alleged Balkan atrocities have decided to abandon their work. Servia and Greece objected to its personnel.

The motorboat Joval, owned by Dr. Kent of St. Anne de Bellevue, turned a complete somersault on Saturday, while going at a speed of 28 miles an hour, throwing the driver, W. E. Baker, of Detroit, and the mechanic 20 feet in the air.

David Lloyd George, Chancellor of the Exchequer in the British Government, has secured reservations at a Toronto hotel in anticipation of his visit to Toronto at the close of the month. He is to attend the convention of the Disciples of Christ.

RIOTS STIR BRITAIN.

Serious Disturbances in Dublin Cause Wide Excitement.

LONDON, Sept. 2.—Both the Unionist and Liberal parties in England are trying to make political capital out of the riots in Dublin, in regard to which the latest reports say that 320 civilians and 45 policemen have been treated at the hospitals, and that one of the civilians has succumbed.

It is argued on both sides that Irish passions have been stirred by the home rule campaign, and that this has been responsible for the lawlessness in Dublin, and also for the recent disturbances in Londonderry.

The Unionist newspapers warn the Government that the home rule bill for Ireland has aroused antagonism and lawlessness throughout that country, while the Liberal newspapers blame the revolutionary preparations in Ulster, made by Sir Edward Carson, the leader of the Irish Unionists party.

James Keir Hardie, the Socialist and Independent Labor member of Parliament, started yesterday for Dublin to participate in the strike movement of the transport workers. One Man Dead.

gave the scheme away.
Russell Clark, a fourteen-year-old newsboy of Kingston, was struck by lightning while delivering his papers and knocked down. He was unconscious for two hours, and one side of his body was paralyzed.
Apparently dead as the result of a suicide pact, though the cause of their action is an absolute mystery, the dead bodies of Carl W. Perry, aged 20, and Miss Angie Spear, aged 19, were found floating in a motor boat on the bay at Portland, Me.

FRIDAY.

Mrs. Louisa H. Parish, who died yesterday in St. Thomas in her 91st year, had lived there since she was four years of age. Her husband died in 1876.

Yesterday morning the corner-stone of the Timothy Eaton Memorial Church on St. Clair avenue, Toronto, was impressively laid by Mrs. Timothy Eaton.

The death occurred at Chatham yesterday morning of Dr. MacFarlane, chairman of the board of education, and formerly professor in the University of Texas.

A warrant has been issued for the arrest of Sam Tadmán, a Moosejaw junk dealer, on a charge of hiring a man at \$75 to paint his rival's store a brilliant pink.

A British Imperial Exhibition will be held in London in 1915 with the object of showing the products and manufactures of the Empire and the increasing trade therein.

With thirty chiefs in attendance, the fifth annual convention of the Provincial Association of Fire Chiefs was opened in the City Council Chambers at Kingston yesterday.

Sir James Whitney has not been very well for the last few days, and to his very great disappointment found himself unable to go down to the celebration at Chrysler's Farm.

The first fatal accident to happen on the Ohio ranges at Camp Perry occurred yesterday when Francisco Ballon of the Peruvian team was killed by one of his fellow countrymen.

George Dickinson appeared in the Toronto police court yesterday morning, but after the reading of the charge against him of murdering Lucy Ives at Smith's Hotel on Wednesday morning, he was remanded eight days to await the outcome of the inquest on the woman.

SATURDAY.

Ald. Richter of London was elected president of Ontario Municipal Association at its meeting in Toronto yesterday.

Rt. Hon. R. L. Borden went to Montreal yesterday afternoon to spend a few days in attendance at the meetings of the American Bar Association.

Robt. W. Wade, associate professor of animal husbandry of the Guelph O.A.C., has been appointed director of the live stock department of the Ontario Branch of Agriculture.

A serious espionage case, involving several French non-commissioned officers has been unearthed by the authorities, who have arrested one man and are searching for others.

Sir Francis Hopwood, assistant Under Secretary of State for the Colonies, who is on a tour of Canada, arrived in Ottawa yesterday, and paid his respects to the Prime Minister.

The University of Saskatchewan senate will ask the Government to carry out a \$500,000 building program next year to include a boarding room and arts building and laboratory.

The Trade and Commerce Department was cabled yesterday by its commissioner at Glasgow, who reports a shortage of pears all over Britain,

son., the leader of the Irish Unionist party.

James Keir Hardie, the Socialist and Independent Labor member of Parliament, started yesterday for Dublin to participate in the strike movement of the transport workers.

One Man Dead.

DUBLIN, Sept. 2.—One man, named Nolan, died yesterday as the result of injuries received in Saturday's strike riots. Another, who was erroneously reported dead, is in a critical condition.

RECORD AGAIN BROKEN.

Labor Day Attendance at Toronto

"Ex." Is 154,000.

TORONTO, Sept. 2.—With perfect weather in its favor the Canadian National Exhibition piled up its biggest attendance on record yesterday when 154,000 persons passed the turnstiles. Only the lack of transportation facilities is believed to have prevented half as many again going to the "fair." The increase over last year's Labor Day attendance is 1,000.

All along Dufferin street and for blocks along King street the cars were stalled in a seemingly unending blockade. Eventually, patience ceased to be a virtue, and thousands, despairing of ever reaching the grounds, abandoned the effort and set forth in other directions for their day's enjoyment.

The most notable event of the day was the big all-Canadian Baby Show, which drew a large number of entries.

The sweepstakes baby was Reginald Stevens Newton, 487 Melrose avenue, Notre Dame street, Montreal, who came first in class three, a lovely boy of not quite fourteen months, fair haired and very alert and bright-eyed.

Copper Strike More Serious.

CALUMET, Mich., Sept. 2.—The copper strike situation took a serious aspect yesterday as the result of the fatal shooting of Margaret Fazakas, aged 15, daughter of a striker at the North Kearsarge mine, when a picket of strikers and women clashed with deputy sheriffs guarding the mine. The deputies claim they were driven from the mining property by the strikers, and when they returned to protect the property that the picketers fired upon them. Miners' leaders denied this, saying the deputies fired without provocation into the crowd of men and women, wounding the girl and several others.

The military forces again took charge of the patrol work about the mines at Wolverine and the Kearsarge as a result of this shooting. Gen. Abbey has ordered an investigation.

John Chambers Dead.

TORONTO, Sept. 2.—After several months' illness, John Chambers, former park commissioner in Toronto, died yesterday afternoon.

Mr. Chambers was born in Canterbury, Kent, Eng., in 1850, and came to Canada in 1871. He entered the services of the city in 1878 as superintendent of the Exhibition grounds, and a few years later was appointed commissioner of parks, occupying that position until 1908.

Under Mr. Chamber's direction the foundation of Toronto's park system was laid.

READY FOR WEDDING.

Eighty Princes and Princesses to Attend Manuel's Nuptials.

BERLIN, Sept. 2.—The marriage of ex-King Manuel of Portugal and Princess Augusta Victoria of Hohenzollern, daughter of Prince William of Hohenzollern, which is to take place on Thursday next, Sept. 4, is to be performed at Sigmaringen, the home of the bride, for which city the former monarch departed from England on Sunday.

Eighty royal princes and princesses have signified their intention of taking part in the ceremony, at which the Prince of Wales will represent King George. The German Emperor, who declared that he would have attended but for the German army manoeuvres, will send one of his sons, probably Prince Oscar, in his place, while the King of Italy will be represented by the Duke of Genoa, and King Alfonso of Spain by the Infanta Don Carlos and the Infanta Louise. Most of these guests will assemble at Sigmaringen on Sept. 3.

A gold wine flagon from Queen Mother Alexandra of England bears the greeting: "For my dear Manuel, King of Portugal, from his affectionate Aunt Alexandra."

SPEED FIENDS DEAD.

Four Professional Racers Killed In Disaster on Track.

NASHVILLE, Tenn., Sept. 2.—Death claimed a heavy toll in the Labor Day automobile speed races at the State Fair grounds yesterday afternoon, when four of the six high-powered cars entered in the 25-mile free-for-all were wrecked and rendered into a mass of twisted steel and splintered wood on the far side of the mile track opposite the big grand stand, wherein were packed 5,000 people.

Four of the dare-devil racers were killed, two received minor injuries, while four escaped without injury of any sort. Two of the cars with their drivers and mechanics flashed through the tangled wreckage of broken cars and maimed bodies at a speed of 60 miles an hour, escaping injury. The dead:

John W. Sherrill, driver of Buick car No. 3.

Thomas R. Bridges, mechanic of Buick car No. 3.

Wm. Sherrod, driver of Stutz car No. 8.

G. Brown, mechanic of Stutz car No. 8.

Esperantists End Congress.

BERNE, Switzerland, Sept. 2.—International Esperanto Congress has declined with thanks the invitation to hold the congress at San Francisco in 1915. This was based on the ground that the journey was too long for Europeans. Paris was selected for the Congress in 1914 and Edinburgh in 1915.

After an eight days' session the congress ended with the feast of international brotherhood. After speeches warmly advocating peace had been delivered by the German engineer, Herr Schiff, and the French General Sebent, an English delegate, Col. Pollen, caused great enthusiasm by embracing both of them.

Rebels Leave Nanking.

SHANGHAI, Sept. 2.—The city of Nanking was captured yesterday by the Chinese Government troops from the rebels, who fled into the country through the southern gate.

Epidemic Near Park Hill.

ST. MARYS, Sept. 2. —

GOVERNMENT SCORED

British Officials Denounced by Labor Congress.

Prohibition of Free Speech In Dublin Comes In For Vigorous Attack on Part of Great International Trades Congress—Labor Day Is Celebrated by Organizations In Canada and Abroad.

MANCHESTER, Eng., Sept. 2.—Unusual interest was attached to the forty-sixth annual trades union congress which opened in Milton Hall yesterday, owing to the existing unrest in the labor world. The number of delegates is 563, making a record, and they represent a membership of 2,250,000 workmen of various trades.

The first business of the congress was the unanimous adoption of a resolution denouncing in virulent terms the British Government and the Lord Lieutenant of Ireland, for prohibiting meetings and strangling free speech in Dublin, and also condemning the brutality of the police.

James Saxton, mover of the resolution, declared that anything done by James Larkin, one of the arrested strike leaders in Dublin, was "white as compared with the hellish blackness of the Irish Unionist leader, Sir Edward Carson, and his associates." He expressed indignation that such treatment could be meted out to workers in a city like Dublin with a Nationalist city council.

Among the delegates are representatives of the American Federation of Labor, while for the first time in the history of the congress, Canada, Germany and France also are represented.

Somewhere in the neighborhood of 100 resolutions, ranging from the wearing of the trade union badge or button to ambitious schemes for the nationalization of the railroads were down on the paper for discussion.

An official reception by the Lord Mayor of Manchester, Samuel Walter Rosey, and the municipality, preceded the opening of the congress.

W. J. Davis, chairman of the Parliamentary committee of the Trades Union Congress, presided, and in his presidential address claimed that the trades unionists had initiated or forced through Parliament most of the great reforms of the past half century.

He expressed the fervent wish that Ireland's aspirations for Home Rule would soon be satisfied. The labor movement, he said, had a great task before it in the promotion of international peace.

Mr. Davis unqualifyingly opposed compulsory arbitration and said legislation would be introduced to strike this weapon out of existence. He advocated the addition of national life assurance to the existing workmen's insurance act, and said that pressure should be brought to bear on the eight hours' question until this reform had also been secured.

Two Parades In Toronto.

TORONTO, Sept. 2.—Labor showed its strength in Toronto yesterday. The labor union men's parade was the largest ever seen in Toronto, and its floats and special features were more numerous and more beautiful than in previous years. Seven thousand men and women marched in the parade in 70 different unions. The carriage of the Canadian Suffrage Association was greeted with ringing cheers.

On University avenue there was very little delay to the parade al—

EARING IN PRIVATE.

Case Closed To Public Declares Judge Hutchinsor.

RBROOKE, Que., Sept. 2.—Superior Judge Matthew nson changes his mind over-the habeas corpus proceedings in the case of Harry K. Thaw held in private.

even Wm. Travers Jerome, f the New York State interests, g Thaw's return to Matteawan, g allowed in chambers. Judge nson announced his decision ght.

had weighed the matter care-ull day, noting meanwhile the elling crowd pouring into Sher- for the fair. On the lips of everyone, was a sympathetic or Thaw. Taking cognizanc-e, and of the outbreak of last day, when Thaw was cheered t as a hero, the judge decided he wisest course would be to e spectators. Reporters also e barred, according to last arrangements, and while the lawyers may be present in a f they so desire, only two ret- ing New York are to take part proceedings. They are Samuel of Montreal, chief Canadian l for the state, and Hector Ver- pearing for the Matteawan Asy- rom which Thaw escaped in a car two weeks ago yesterday. W is to be driven from the jail outhouse in a closed carriage, ge of Governor La Force.

Rebels Leave Nanking.

SHANGHAI, Sept. 2.—The city of Nanking was captured yesterday by the Chinese Government troops from the rebels, who fled into the country through the southern gate.

Epidemic Near Park Hill.

ST. MARY'S, Sept. 2.—Four cases of a severe type of infantile paralysis have developed in the country within a few miles of Park Hill.

Sockeye Season Extended.

BELLINGHAM, Wash., Sept. 2.—The Provincial Fisheries Department of the Canadian Government has officially extended the sockeye salmon open season until Sept. 15, knowing that sockeyes may not be caught in Puget Sound waters after Aug. 25. This information was received yesterday by State Fish Commissioner L. H. Darwin from W. J. Bowsock, commissioner of fisheries of British Columbia. The extension, according to Commissioner Bowsock has been authorized as a result of the failure of the United States to ratify or obtain definite action upon the recommen-ation made by the fisheries commis-sion, consisting of Dr. David Starr Jordan and Dr. E. E. Prince in 1910.

Hydro Inaugurated.

HAGERSVILLE, Sept. 2.—A big demonstration was held here last evening, when the formal opening of the Hydro-electric system was held, and it was a great disappointment when the Hon. Adam Beck failed to turn up, as he missed railway con-nections.

Getting it All Together.

"Where's my breakfast?" inquired the star boarder.

"Well sir," replied the landlady, "I got a nice bit of fish for you, but, I'm sorry to say, sir, the cat" —

"Confound the cat! Then let me have cold chicken."

"I regret to say, sir, the cat" —

"Well, then, some eggs"

"There are no eggs in, sir. The cat" —

"Hang it all then! Cook the cat and we'll have it all together."

Mustache May Go.

It is said that the army regulations which enact that the "upper lip of soldiers shall not be shaved" is about to be abolished. Should this rumor be well-founded we shall see clean-shaven soldiers in the "Regulars" very soon. There is no denying that the "no shaving" rule is unpopular with officers and men alike.

An Indorsement.

She: What did you think of the minister's expression of the belief that the world would soon come to an end?

He: I was rather inclined to think it would before he got through with his sermon.

Better Castles Than Caverns.

I find the gayest castles in the air that were ever piled far better for comfort and for use than the dungeons in the air that are daily dug and caverned out by grumbling, discontented people.—Ralph Waldo Emerson.

Cornered.

"Love conquers all things," said Vergil. But he forgot the tight shoe with a corn inside it.—Cleveland Leader.

Shiloh's Cure
QUICKLY STOPS COUGHS, CURES COLDS
HEALS THE THROAT AND LUNGS. 25 CENTS

the labor union men's parade was the largest ever seen in Toronto, and its floats and special features were more numerous and more beautiful than in previous years. Seven thousand men and women marched in the parade in 70 different unions. The carriage of the Canadian Suffrage Association was greeted with ringing cheers.

On University avenue there was very little delay to the parade, although there was some tie-up on Queen street. No accidents happened nor were there any disagreeable features. The National men, some 200 strong, marched about 15 minutes before, and neither party interfered with the other in the slightest manner.

London and St. Thomas Join.

LONDON, Ont., Sept. 2.—The Labor demonstration here yesterday was the biggest celebration of its kind in some years, the St. Thomas trades unions uniting with the labor men of London in a demonstration at Queen's Park. This was preceded by a parade, in which all the members of organized labor in the two cities took part. Upwards of 4,000 people were present.

Towns Join In Big Celebration.

GALT, Sept. 2.—A big celebration under the auspices of the South Waterloo Federation of Labor marked the holiday in Preston. A parade in which unions of Galt, Preston, Hespeler, Berlin and Brantford took part was held at one o'clock. This was followed by sports in Speed Park.

Women and Girls Marched.

WINDSOR, Sept. 2.—Citizens of Windsor lined the streets yesterday to witness what was generally conceded to be the biggest and best Labor Day parade in the history of the city. Two thousand were in line of march. Of this number two hundred were girls and young women, members of the Windsor branch of the International Union of Cigarmakers.

Had All-Day Picnic.

KINGSTON, Sept. 2.—The labor men of Kingston observed the day by holding a picnic at Lake Ontario Park, preferring an all-day outing to a parade. Field sports were held morning and afternoon, the morning events being devoted to the school children.

A Problem For Wilson.

WASHINGTON, Sept. 2.—Chairman Flood of the House foreign affairs committee yesterday submitted to Secretary Bryan letters from a large sugar company in Vera Cruz, asking to whom its property should be entrusted if President Wilson's advice to all Americans to get out of Mexico were to be followed. The letter stated that the company's plant cost \$1,500,000, that it had a growing crop valued at \$500,000, and that if those in charge left Mexico, valuable property would be at the mercy of bandits.

The Winnipeg civic board of works has decided to shut down on local improvements.

Adrianople Prefers Turks.

ROME, Sept. 2.—An Ottoman mission has arrived here and will submit to the Italian Government proofs collected since the mission visited Paris, showing, it is said, the unanimous desire of the people of Adrianople to remain under Turkey.

Turkish Cavalry Advancing.

SALONIKA, Sept. 2.—A column of Turkish cavalry is advancing on the town of Xanthi on the railroad from the Port of Dedeaghat on the Aegean Sea to Saloniki. The Bulgarian garrison has withdrawn.

the day, and drove home at night," said a suburbanite. "Then, for the first time, I began to sense the feeling of mutuality or mutual sympathy, if such an expression may be permitted between animate and inanimate things, between the machine and myself. Several trips by myself confirmed the sensation; then I bought another car for the family and now drive myself regularly in this one.

"I have often thought of the stories told by locomotive engineers in which their great engines are endowed with almost mental faculties. There are enough of them to fill a book, but I never considered them seriously until I began with this car. Sometimes the engine sings; sometimes it purrs. I know its 'sing' and its 'purr.' If anything is the matter with it it tells it in a language entirely intelligible to me. It responds to my lightest touch in all its functions, but once," and here his voice became grave, "it refused to run into an unlighted ditch where I was trying to steer it. I looked for half an hour for the trouble with the steering apparatus, but could find nothing wrong."—Suburban Life.

INSTINCT IN PLANTS.

Actions That Seem to Indicate Some Sort of Nervous System.

Plants sometimes appear to possess reasoning power. Charles Darwin instanced the case of the rootlet, which, piercing its way through the soil and detecting a stone or lump of hard clay in its path, will go round it without touching it. "How does the rootlet or plant know that the stone is there?" he asks. "Certainly it cannot see it and as it does not touch it cannot feel it. The avoidance therefore seems to be in the nature of perception of some kind which is a mental operation."

The species of mimosa known as the sensitive plant will contract its leaves even at the sound of a footstep, and when such a plant is being transplanted it crumples up during the process in such a way that it really appears to be suffering from fear. Afterward it recovers and resumes its ordinary mode of life.

Plants undoubtedly possess consciousness of a kind which enables them to carry out certain operations necessary to their preservation, and this can only be done through the possession of some sort of nervous system.—London Standard.

Disraeli's Nuptial Joke.

There was a little joke between them (Disraeli and his wife) which I heard from the late dean of Salisbury. "You know I married you for your money," Disraeli would say to her. "Oh, yes, but if you were to marry me again you would marry me for love," was the regular reply. "Oh, yes," her husband would exclaim, and the little nuptial comedy ended.

But what Disraeli said to Bernal Osborne once about his marriage is much better worth the telling. It was at a dinner party after dinner when the men were alone. "What did you marry her for?" Osborne asked in his characteristic way. Disraeli twiddled his wineglass in the pause that followed this point blank inquiry. Then he lifted his head slowly and looked the other very expressively in the face. "For a reason," he said, "which you could never understand—gratitude."—"Lord Beaconsfield and Other Tory Memories."

"I am an old man—and many of my troubles never happened."—ELBERT HUBBARD

THE white hair and wrinkled faces of our busy men and women tell of doubt, fear and anxiety—more than disease or age. Worry plays havoc with the nervous system—so that digestion is ruined and sleep banished. What oil is to the friction of the delicate parts of an engine—

DR. PIERCE'S Golden Medical Discovery

is to the delicate organs of the body. It's a tonic and body builder—because it stimulates the liver to vigorous action, assists the stomach to assimilate food—thus enriching the blood, and the nerves and heart in turn are fed on pure rich blood. Neuralgia "is the cry of starved nerves for food." For forty years "Golden Medical Discovery" in liquid form has given great satisfaction as a tonic and blood maker.

Now it can be obtained in tablet form—from dealers in medicine or send 50 one-cent stamps for trial box. Write R. V. Pierce, Buffalo.

DR. PIERCE'S PLEASANT PELLETS

CONSTITUTION AND CLOSURE

GOVERNMENT SEEKS FATUOUS EXCUSES FOR ITS "GAG" METHODS.

In his speech at Vancouver on August 18th, Hon Robert Rogers tried to justify the forcible passage of the closure rules by the Borden government, under his leadership, by declaring that the Liberals themselves had proposed to introduce the closure into parliament. In support of this contention Mr. Rogers triumphantly produced a rough draft of such measure which he alleged had been prepared by Sir Allan Aylesworth, as Minister of Justice in the Liberal government. This amounted to a declaration on Mr. Rogers' part that without any sense of shame he was willing to ransack the pigeon holes of a departed Ministers' desk to purloin evidence against the past government, which to say the least was a questionable sample of political propriety.

The uselessness of this was shown by the fact that no closure had ever been introduced by the Liberal government, while Sir Wilfred Laurier explicitly stated that he had never considered the introduction of the closure methods, nor had such a move ever been considered by his cabinet.

But supposing Sir Allan Aylesworth had drafted proposals for a closure measure. Supposing several of the leading members of the Liberal ministry had publicly stated that they were prepared to support such a measure in parliament. How does that alter the position of affairs or exculpate the Borden government from the blame which Hon. Mr. Rogers evidently regards as needing such drastic apologies? The fact remains that the Liberal government, with Sir Wilfred Laurier at its head, did not stoop to force reciprocity through parliament by the "gag", as Mr. Borden and Mr. Rogers tried to do with the Naval Aid Bill. The difference between the Laurier and Borden methods affords an illuminating contrast as between

The difference between the two debates was that in 1911, the Conservatives in opposing the reciprocity bill deliberately held up the country's business. Laurier could have clubbed them into submission with the closure measure, but refused, and appealed to the people.

The Liberals in opposing the Naval Aid Bill, fought it alone, with every weapon at their disposal. They did not obstruct any other business, nor did they withhold supply. They were met with a drastic closure rule which was introduced in an unfair and constitutional manner and used as unfairly as it had been introduced, while the Borden-Rogers combination refused to appeal to the people.

If the Tories can get any satisfaction from such a comparison they must be badly in need of comfort.

WHY THIS DELAY.

NO EXPEDITING OF ELECTION PROTESTS UNDER BORDEN-ROGERS METHODS.

The Macdonald bye election protest was entered November 18th, 1912. The Richelieu bye election bribery attempts were exposed in parliament by Sir Wilfred Laurier on November 25th, 1912. The charges that systematic telegraphing and impersonation had been organized by Hon Louis Coderre during the Hochelaga bye election were first made public on March 8th, 1913, by Tancred Marcil who claimed to be one of Mr. Coderre's impersonating organizers. The Macdonald protest has been deliberately delayed in the courts ever since by technical objections. The government refused investigation into the Richelieu by election, and government members at the demand of Rt. Hon. Mr. Borden passed a vote whitewashing Hon Mr. Coderre and refused any investigation.

In August, 1907, when he laid down his "Halifax Platform," Mr. Borden made as a leading plank of his policy—"To expedite the hearing of election petitions.....and if necessary to appoint an independent prosecuting officer charged with that duty."

Has Rt. Hon. R. L. Borden, Prime Minister, forgotten all this since he listened to the syren voice of Hon. Robert Rogers? Perhaps the expediting of these cases might be confided to Hon. Arthur Meighen, the new Attorney-General. Can it be that Premier Borden does not want to expedite the exposure of his colleagues' iniquities?

A GORGEOUS PARADE.

COL. HUGHES AND HIS GOLD PLATED BRIGADE IN ENGLAND.

Col. Hon. Sam Hughes ought to be creating some excitement in England with his gold plated brigade and

conference of 1909 at which this agreement was made, returned to Canada and found the Conservative leaders had suddenly abandoned their agreement to the idea of a Canadian Navy. In the face of this schism the Laurier government loyally carried out its agreement, and passed the Naval Bill, of 1910 which provided for the construction in Canada of vessels to cost over eleven million dollars. In the middle of this was intruded the reciprocity debate which ended in the defeat of the Liberal government. At once the Conservative party at the behest of their Nationalist allies abandoned their Canadian share in the Imperial agreement of 1909 and refused to carry out the Naval policy to which Canada was in honour committed.

This is the reason why there is no naval controversy in Australia. This is why the volte face of the Tories precipitated the Naval controversy in Canada.

PACIFIC OCEAN BRIDGE.

Strange Secrets Revealed by Distribution of Plants and Animals.

The distribution of plants and animals reveals strange secrets of the past history of the world. The fact that there were elk, red deer and wolves in Ireland shows that Ireland, like England, was once joined to the continent of Europe. There are moles in England, but none in Ireland. This shows that Ireland was separated by sea from England before the moles arrived. In the same way the absence of native land mammals from Bermuda proves that this island has always been

surrounded by wide spaces of ocean. The Belgian botanist, Hans Haller, has been searching into the past secrets of the Pacific Ocean and its islands by examining the strange and often quite peculiar plants, such as the geranium trees of Hawaii, which are found in them. He has been led to form somewhat startling conclusions. He believes that the great Malay Islands, together with Australia and large numbers of Polynesian Islands scattered over thousands of miles of the Pacific Ocean, once formed part of a great peninsula stretching southeastward from China, most of which subsequently sank either wholly or in part, leaving the highlands which became Tasmania, New Zealand, New Caledonia, the Louisiades at the southeast corner of New Guinea, New Guinea itself, the Moluccas, Celebes, the Philippines and Formosa above the ocean, to serve as centres of plant distribution between China and Polynesia, this crooked string of great islands being separated by deep ocean from eastern Australia.

In still earlier times, according to Haller, the ancient peninsula above described had been connected by land with the American continent, thus forming a veritable bridge across the Pacific Ocean. The northern boundary of this bridge was formed by a line drawn from southern Japan through the Hawaiian Islands to Lower California, while its southern boundary passed from Tasmania toward New Zealand by way of the Auckland and Campbell Islands, and then farther eastward through Tahiti and the Society Islands; then approaching the American coast through Easter Islands, Sala y Gomez and Juan Fernandez, supposed to be the Island of Robinson Crusoe, and finally reaching the American continent at a point now in the south of Chile.

Mirrors at Road Crossings.

Mirrors at road crossings for warning automobiles are coming into use in England, it is stated, and the results are very good. They are being put in places where the crossings are special.

The Kind You

In Use For

THE CENTAUR COMPANY

THEY SAW THE LAKE

An African Phenomenon That Like a Waterspout.

Crossing Victoria Nyanza, F. H. Melland and E. H. Cholmondeley, the authors of "Through the Heart of Africa," saw a phenomenon which though common on the lakes of Africa, seems rare enough.

The chief engineer on coming late to luncheon told us that he had seen a waterspout near by. He had finished our meal we hurried on deck to get a glimpse of it. It was near the southern horizon, a smoke-like column arising from the surface of the lake and expanding into what looked like a cloud. Thinking that it must be the English waterspout, we approached (Gray and Mr. Akeley, who were intently observing it, and asked if we were right in our conjecture. "Waterspout!" said the skipper with a smile. "Flies."

"Flies?" we repeated and turned Mr. Akeley in the hope of getting him a more intelligible explanation. "Quite true," he said. "Flies, seen the lake fly before?" "No," we retorted, "we haven't seen it, we didn't know that it flew."

London government from the plain of the Hon. Mr. Rogers evidently regards as needing such drastic ap-
 plications? The fact remains that the Liberal government, with Sir Wilfred Laurier at its head, did not stoop to force reciprocity through parliament by the "gag", as Mr. Borden and Mr. Rogers tried to do with the Naval Aid Bill. The difference between the Laurier and Borden methods affords an illuminating contrast as between the domineering methods of Toryism and the constitutional ideals of popular government as followed by the Liberals.

On January 26th, 1911, Hon. Mr. Fielding, Minister of Finance, presented the reciprocity proposals to parliament. The government then allowed time for the matter to sink into the public mind, and it was discussed universally, as much outside as inside parliament. The debate in parliament was continued, month after month, and an absolute dead-lock developed in which the Tory Opposition refused to vote supply. It was the boast of the Conservatives that they were deliberately preventing the government from carrying on any public business with the intention of forcing them to the country. At this time Sir Wilfred Laurier had a majority of 47 in parliament. There was nothing to prevent him from putting through the closure resolution by the dead-weight of this majority (as Mr. Borden did later on) and then force the passage of the reciprocity measure by the use of the "gag." He was even urged by some of his followers to adopt this course. Sir Wilfred refused to avail himself of this power in a matter of such national importance. He declined to consider closure and after 6 months of Conservative obstruction. Parliament was dissolved on July 29th, 1911. At this time, the proposed reciprocity bill had not even received first reading, while public business was at a standstill, owing to the arbitrary course of the Opposition.

What is the Tory history in this connection? Mr. Borden presented his Naval measure on December 5th, 1912. In so faulty a manner that it was only by the consent of the Opposition that his methods were put into proper form. The Naval discussion started on December 12, 1912, and continued intermittently until February 27 1913, when the bill received second reading. When parliament resumed in March, the Bill was taken up in committee and Mr. Borden tried to bludgeon the Liberal Opposition into submission with two weeks of continuous day and night sessions, without success. Early in May Mr. Borden put through his closure measure, not in a constitutional manner but by a resolution forced through parliament by a brute majority, and by a parliamentary trick which made it impossible to fairly discuss the rules or amend them in any degree. Then the Naval Aid Bill was railroaded through parliament by the aid of the "gag."

But during this whole debate, which had not lasted nearly as long as the reciprocity debate, many other important measures have been dealt with and the Opposition, instead of preventing supply as the Conservatives had done, consented to the passing of one-third of the estimates en bloc and had assisted in the passage of other important bills.

Attorney-General. Can it be that Premier Borden does not want to expedite the exposure of his colleagues' iniquities?

A GORGEOUS PARADE.

COL. HUGHES AND HIS GOLD PLATED BRIGADE IN ENGLAND.

Col. Hon. Sam Hughes ought to be creating some excitement in England with his gold plated brigade and "splendid staff." All that is lacking to complete the outfit is a brass band. Col. Hughes' party consists of:

THE COLONEL.

"His Splendid Staff."

23 Canadian Militia Officers.

19 Canadian Ladies.

2 Lady Stenographers.

Servants, etc.

"God Save the King."

There should be another substantial expense account for the Auditor-General to attend to when the Col. the Hon. Sam Hughes brings his party home.

"BOSS ROGERS" AND HIS CLUB.
 WANTS TO CONTROL WESTERN VOTERS' LISTS AND WARNS PROVINCES TO BE GOOD.

Hon. Robert Rogers, in his western campaign to keep his position as boss of the government has gone the Premier one better. Hon. Mr. Borden merely "canned" his speeches and presented them to party organs tagged for publication on certain dates. Hon. Robert Rogers has become his own press agent. He not only makes his speeches but sees to it that favorable reports of them are telegraphed over the country to reliable Tory papers, even though he has to pay the telegraph tolls himself.

There are several gentlemen in the Borden cabinet in a position to agree with the Conservative newspapers that a short time ago declared Hon. Mr. Borden had some colleagues who were viewed with suspicion by the people. It was not without a sinister intent that Hon. Mr. Rogers at Moose Jaw intimated that at next Federal election the Dominion Government would take steps to look after the Saskatchewan voters' lists. It is plain that Hon. Mr. Rogers hopes to cover up his rebuff of the last Saskatchewan provincial elections by trying to get control of the provincial voters' lists. Hon. Mr. Rogers further hinted that if the province of Saskatchewan wanted to secure proper attention to its claim on the Dominion government it must elect Conservative majorities.

ORIGIN OF NAVAL DISPUTE.
 TORIES BROKE AGREEMENT WHICH AUSTRALIA CARRIED OUT.

On his return from Australia, with nothing to show for his six months' trip but a big expense account, Hon. Geo. E. Foster triumphantly declared, "There is no such controversy in Australia about the proper way to take part in Imperial Naval defence as has taken place in Canada."

In saying this Hon. Mr. Foster evidently attempted to cast a reflection upon the Liberal party in Canada. As a matter of fact he exposed the weakness of the Conservative position.

There is naturally no partisan controversy in Australia with regard to Imperial defence. At the Imperial conference of 1909, Australia and Canada decided on an arrangement by which each would build certain naval units as the beginning of their share in Imperial defence. The Australian ministers went home, prepared their plans, and went straight ahead with construction. Now they have a well-defined Australian naval unit, practically completed. Although there has been a change of government, there has been no change of policy. The original idea of an Australian naval unit as part of the Imperial navy has been loyally adhered to. The Canadian Ministers, after the

the island of Robinson Crusoe, and finally reaching the American continent at a point now in the south of Chile.

Mirrors at Road Crossings.

Mirrors at road crossings for warning automobiles are coming into use in England, it is stated, and the results are very good. They are being put in places where the crossings are specially dangerous, and the use of large mirrors allows the driver to see the reflection of cars which are coming in other directions. The method will probably be extended in the future, as it is likely to avoid many accidents and will be well worth the small cost of putting in. Another use for mirrors is upon heavy power wagons, where the driver cannot hear the signals of automobiles back of him so as to have him take the right hand side of the road to allow them to pass, for the noise of the power wagon often prevents the horn from being heard. It is proposed to fit the power wagons with small mirrors showing the back of the road.

Finer Men Needed.

Speaking in the Eugenic Section of the British Medical Association Conference at Brighton, Sir Jas. Barr said that we wanted to raise a race which would be more or less immune from disease, and which would have inherent powers of recovery. If we were to retain our vast possessions we must have a more manly breed, a better ruling stock than those who row directed the destinies of our Empire. We needed not only physique, but moral and intellectual capacity. It was emphasized that the present freedom of marriage should not be interfered with.

Pictures Were Fakes.

Those who expected exorbitant sums would be realized by the sale at Christie's of a number of pictures belonging to the late Duke of Sutherland were sorely disappointed. The expectation of sensational bidding brought crowds of people to the auction rooms, but for the first hour not one picture had inspired the dealers to a thousand-pound bid. A picture attributed to Velazquez sold for £2610c., two Titians were for £23 2s. each, and a Tintoretto for £8 8s. There seems to have been, in fact, a slump in old masters at the sale.

Ostrich Markets.

A prominent ostrich grower of the Oudtshoorn district of the Cape Province is about to visit China and Japan, taking with him a quantity of feathers, which are to be distributed gratis amongst those in a position to influence fashions. The ever-growing production of feathers necessitates the finding of new markets, and the Far East is believed to possess potentialities of great value in this regard.

Advice to Lady Gardeners.

Make up your beds early in the morning, sow buttons on your husband's clothes, do not rake up any grievances, protect the young and tender branches of your family, plant a smile of good temper on your face, carefully root out all angry feelings, and you may expect a good crop of happiness.—Exchange.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years were supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven Catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for particulars and testimonials.

Address: F. J. CHENEY & CO., Toledo, Ohio. Sold by Druggists. Take Hall's Family Pills for constipation.

If we were right in our conjecture "Waterspout!" said the skipper a smile. "Flies." "Flies?" we repeated and turned Mr. Akeley in the hope of getting him a more intelligible explanation. "Quite true," he said. "Flies, seen the lake fly before?" "No," we retorted, "we have never didn't know that it flew." Assuring us that neither he nor skipper had any intention of deserting, Mr. Akeley explained that referred to the insect known as the fly and not to any spasmodic volition on the part of the water Victoria Nyanza. The apparent spout was nothing more or less than a huge cloud composed of myriads of tiny flies. They sometimes rise from the surface of the lake in such columns as to obscure the light sun like a pillar of smoke.

TRICKS OF LIGHT.

Why People Sometimes Feel Uncomfortable at Table.

How few people realize that they are actually suffering from snow blindness in miniature every time they read or work over a white surface which a brilliant light shines on. Half tone paper, for instance, is the common medium for the printing of books we read, will throw a strong glare into the eye of the reader. The light strikes it at the wrong angle and it forms an excellent test for selection of proper lighting for the eyes and for the placing of the light fixtures, for lighting diffusion should be such as to allow comfortable reading from half tone paper in any position.

A dome hanging above a dining room on which is white cloth causes light to reflect into the eyes of those around the table at an angle that duces muscular strain. This peculiar effect upon the sense of drowsiness and mental inertia is to result. People are apt to complain of a feeling of dullness at table that they have indigestion when in reality, the effect of the light is to do so.

A too brilliant light shining directly into the eye plays many curious optical tricks. Deaf people, for instance, cannot hear so well if they are facing a brilliantly lighted room, and, as for being able to see better by a bright light than by a dim one, actually the reverse is the case, for the tail of objects become practically invisible to the eye when too much light is thrown upon them.—Suburban Life Magazine.

Shopping in Ottawa.

In Ottawa the credit system is not so completely the habit of the people and storekeepers alike, as it is in the larger cities. The story is told of the late Mr. A. J. C. a Toronto newspaper man, who was a member of the Press Gallery years ago, that when she offered cash to her grocer, that worthy refused. She had asked him for a reduction in the price of her purchases, that she was willing to pay cash, that as everyone else seemed to do, and long credit she thought she ought to be given a discount.

"My dear madam," said the grocer, "I could not allow you a discount. Moreover, I would prefer you should go on the credit system with everyone else. The books are open and you might as well use the credit as you would only be a nuisance to have a customer paying cash when everyone else goes on credit. What would you use of me taking 50c. or 60c. off the bank after a day's business?"

Every Woman
 is interested and should know about the wonderful
Marvel Whirling Spray Douche

Ask your druggist for it. If he cannot supply the MARVEL, accept no other, but send stamp for illustrated book—sealed. It gives full particulars and directions valuable to ladies. WINDSOR SUPPLY CO., Windsor, Ont. General Agents for Canada.

the Kind You Have Always Bought

In Use For Over 30 Years.

THE CENTAUR COMPANY, 77 MURRAY STREET, NEW YORK CITY

REJECTED LOVERS' FREAKS.

Disappointed People Who Have Kept Strange Vows.

There recently died in Paris an old man who for over forty years had wandered nightly through the streets of the Gay City in search of his sweetheart, who mysteriously disappeared on the eve of her wedding. Her husband-to-be was firmly convinced that she had been kidnapped, and he vowed that he would find her. Every evening, after finishing his work, he would walk about the streets of Paris anxiously scanning the faces of the women he met in the hope of meeting his lost one. He kept up his search in vain to within a few days of his death.

Only a little time back Magdalene Hermann, of Gronau, Saxony, was removed to an asylum for the mentally diseased, and her confinement there added the closing chapter to a pathetic romance. Twenty years ago a smart artillery regiment was quartered at Gronau during the Imperial manoeuvres and Magdalene fell in love with a sergeant, who finally promised her marriage. The promise, however, was not seriously intended, and the false soldier left her. From the day of his disappearance the girl never ceased to meet trains that came from the sergeant's garrison town in the hope that he would return to her. He never appeared, and Magdalene jumped to the conclusion that the German War Office opposed the wedding and was keeping the sergeant from her. Thereupon she bombarded the military authorities with petitions for permission to marry the soldier, and when they ceased to answer her letters she fancied that the post office was suppressing them. Until the day when she was removed to the asylum she walked ten miles daily to post her letters in a neighboring town.

An extraordinary character was Jules Bourglay, who lived for the greater part of his life in caves and woods, and who died a year or so ago on a common. He was a miserable-looking individual, and was known as "The Old Leather Man" on account of his always being dressed in a suit of leather. For over thirty years he wandered over portions of Eastern New York and Connecticut. A disappointment in love was said to have made him vow that he would never again allow himself to have the society of a woman, and for that reason he shut himself up in the woods.

One of the strangest men who ever lived died some time ago at the Winchester Workhouse. His name was George Montagu Hawkins, but to the authorities he was known as "The Silent Man" owing to the fact that during the fifteen years he had been an inmate of the institution he only spoke twice. The first occasion on which he made use of his tongue was a few years ago when he asked the master for his own clothes so that he might take his discharge, and the second was two days before his death when he suggested to those attending him that he might be allowed to get up.

A Portsmouth lawyer once visited Hawkins at the Winchester Workhouse and informed him that a relative had died and left him a legacy. "The Silent Man" was not at all pleased with the news, and when he was asked to sign a paper in order to become possessed of the sum of money that had been willed to him he shook his head and walked away. As a result the legacy was never paid over to him.

Bank Notes Made of Silk.

It is possible that before long all bank notes will be printed, not on paper, but on silk of a particular shade. It is by means of photography that most clever bank note forgeries are effected. A company held a private demonstration recently when Mrs. Ernest Hart explained a new process which she has invented for waterproofing fabrics

FARMER'S WIFE ALMOST A WRECK

Restored to Health by Lydia E. Pinkham's Vegetable Compound—Her Own Story.

London, Ont.—"I am a farmer's wife and a very busy woman. Last summer

I was taken with severe pains in my back so bad that I could not get up or scarcely move without pain, and my periods were painful. My husband called in a good doctor and I was under his care for some time, but he did me little or no good.

One day a friend of mine told me to try Lydia E. Pinkham's Vegetable Compound as she had been greatly helped by it. I began taking it and soon got well, and my periods became natural again. Since then I have had perfect health. In fact I have never felt so well in my life. Lydia E. Pinkham's Vegetable Compound is a medicine many women need. If you think this letter will help other women please publish it."—Mrs. K. C. YOUNG, Tambling's Corner, London, Ontario, Canada.

Women who suffer from those distressing ills peculiar to their sex should not doubt the ability of Lydia E. Pinkham's Vegetable Compound to restore their health.

If you have the slightest doubt that Lydia E. Pinkham's Vegetable Compound will help you, write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass., for advice. Your letter will be opened, read and answered by a woman, and held in strict confidence.

"MOVEE" RECRUITING.

The Film is a Valuable Feature in Many Lines.

The man in the street regards the moving pictures as an amusement only. A few people realize their educational value, but the "Trade" is finding wider scope for their use every day of the week. They are invading all walks of life, the latest move being recruiting the armies and navies of quite a number of the more important nations. A few months ago a film was taken showing the Irish Guards parade drill, and films have been taken of other army regiments and shown in Territorial halls all over the country, generally accompanied by lectures.

In addition to having films taken showing French army life, the military authorities of that wide-awake nation have devised an ingenious and unique use for the screen. This is erected at one end of a parade ground. A hundred yards distant stands a company marksmen. On the screen comes a regiment of riflemen apparently charging the living soldiers. These are supposed to be on the defensive, and fire rapidly at the moving figures on the screen. The effects of this fire are carefully noted, and the lessons learnt from it are said by those who ought to know to be more valuable than those learnt from actual manoeuvring, where only blank cartridge is usable.

SAW THE LAKE FLY.

American Phenomenon That Looked Like a Waterspout.

King Victoria Nyanza, Messrs. Melland and E. H. Cholmeley, thors of "Through the Heart of," saw a phenomenon which, although common on the lakes of central Africa, seems rare enough. A chief engineer on coming down to luncheon told us that he had a waterspout near by. As we finished our meal we hurried up to get a glimpse of it. We saw the southern horizon a gray-like column arising from the edge of the lake and expanding that looked like a cloud above. That it must be the engineer's spout, we approached Captain and Mr. Akeley, who were also observing it, and asked them were right in our conjecture. terspout!" said the skipper, with a "Flies."

"Flies?" we repeated and turned to Akeley in the hope of getting from him more intelligible explanation. "It's true," he said. "Flies. You've seen lake fly before?" "We retorted, 'we haven't, and I don't know that it flew.'"

A Labor Editor.

Joseph Marks, the editor of the Industrial Banner of Toronto, is a veteran of the labor movement in Ontario. Quiet and unassuming, he is best known to a few intimate associates. It is over twenty years since the Industrial Banner was founded in London, Ont., and it is only recently that the paper was taken over by the Labor Educational Publishing Company, and "Joe," as he is called, took the paper to Toronto.

Kindliness and consideration of other people's feelings have made him liked wherever he is known. The Toronto Railway employees made him an honorary member of the union when he removed to Toronto. The Trades Council in London presented him with a gold watch a short time ago, in appreciation of his great work in London. When it is necessary to stand up for a principle Joseph Marks can put up both with voice and pen a spectacular fight.

It is news to most men in the labor movement to know that it was "Joe," who first ran the gauntlet and proposed to Sir James Whitney that he amend the Assessment Act, giving municipalities the local option in taxation. Mr. Marks was then a member of the Ontario Executive Committee of the Trades and Labor Congress. If you want to see the editor of the Banner laugh, ask him if he remembers the time he proposed the change to Sir James and the verbal mix-up both got

terspook!" said the skipper, with le. "Flies."

"Flies," we repeated and turned to keley in the hope of getting from a more intelligible explanation. ite true," he said. "Flies. You've he lake fly before?"

ring us that neither he nor the r had any intention of deceiving r. Akeley explained that he rel- to the insect known as the "lake and not to any spasmodic fri- on the part of the waters of ia Nyanza. The apparent water- was nothing more or less than e cloud composed of myriads of lies. They sometimes rise from urface of the lake in such dense ss as to obscure the light of the ke a pillar of smoke.

TRICKS OF LIGHT.

People Sometimes Feel Dull or Uncomfortable at Table.

few people realize that they tually suffering from snow blind- in miniature every time they r work over a white surface on a brilliant light shines directly. one paper, for instance, which is mmon medium for the majority ks we read, will throw a blind- into the eye of the reader if ght strikes it at the wrong angle. forms an excellent test for the ion of proper lighting for a room or the placing of the lighting fix- for lighting diffusion should be as to allow comfortable reading half tone paper in any position. me hanging above a dining table hich is white cloth causes the to reflect into the eyes of those l the table at an angle that pro- muscular strain. This has a ar effect upon the senses, and iness and mental inertia are apt ult. People are apt to complain feeling of dullness at table or hey have indigestion when it is, lity, the effect of the light.

o brilliant light shining directly he eye plays many curious psy- cal tricks. Deaf people, for in- a, cannot hear so well if they icking a brilliantly lighted room, s for being able to see better by ht light than by a dim one. ex- the reverse is the case, for de- objects become practically lost ey when too much light enters burban Life Magazine.

Shopping in Ottawa.

Ottawa the credit system has be- so completely the habit of shop- nd storekeepers alike, that it is e dealers even object to taking The story is told of the wife of nto newspaper man, who became iber of the Press Gallery a few ago, that when she offered to pay o her grocer, that worthy object- he had asked him for a reduction price of her purchases, stating he was willing to pay cash, and s everyone else seemed to de- credit, and long credit at that, ough she ought to be given a nt.

y dear madam," said he, "I nt allow you a discount of any . Moreover, I would prefer that ould go on the credit system like e else. The books are there, o might as well use them. It only be a nuisance to have one er paying cash when everyone es on credit. What would be the me taking 50c. or 60c. cash up ank after a day's business?"

whomst ran the gauntlet and proposed to Sir James Whitney that he amend the Assessment Act, giving municipal- ties the local option in taxation. Mr. Marks was then a member of the Ontario Executive Committee of the Trades and Labor Congress. If you want to see the editor of the Banner laugh, ask him if he remembers the time he proposed the change to Sir James and the verbal mix-up both got into afterwards.

Her Lucky Escape.

The following is an extract from a Police Court report published in the Evening Telegram, of Toronto: "Her head swathed in bandages, Maria Ceccacci, the Italian woman who fought for her life with a baby in her arms last Tuesday, told of having been at- tacked by Giovanni Roberts, her assail- ant being armed with a knife at the time.

"He drew his knife and slashed me," said the woman.

"Where did he cut you?" asked Mr. Hughes.

"On the sidewalk," replied Maria. "A wound in such a vital spot might well have proven fatal."

No Arms in Church.

An order has been issued by the Department of Militia, at Ottawa, forbidding the carrying of arms by militia units and cadets on Sunday church parades. A regulation to this effect has been on record for some time past, but in recent years has been frequently transgressed. The growth of the Boy Scout and Cadet movements, and the tendency of these junior corps to carry arms on all occasions when on parade, have made it necessary, in the interests of safety and on other grounds, to enforce the regulation.

Dispensed With Ashes.

Growing so weak towards the end that the rigorous Trappist rule that every member of the order shall die on the floor amid sackcloth and ashes was for once dispensed with, Right Rev. Dom Antoine Agar, O.C.R., famous head of Canada's most picturesque branch of the Trappist Order died at Oka recently. His death for weeks was re- garded as being only a matter of hours, but the mighty spirit within the frail body fought off for days the final passing. Two weeks ago he was carried on his bed into the monastery chapel, to witness the religious exer- cises attendant upon the celebration of the feast of our Lady of Mount Carmel. He was named the first mitred abbot of the monastery in 1902.

Drunk on Cod Liver Oil.

When Henry Weaver, of Chatham Township, Ont., appeared in the County Police Court recently to answer to a charge of being drunk while on the in- terdicted list, he stated that while he may have been intoxicated on that par- ticular day he became so by using a certain preparation of cod liver oil. He confessed to having taken in all eigh- teen bottles of the remedy during the past few months. A bottle of the mix- ture shown in court had printed on the label, "24 per cent. alcohol."

Bank Notes Made of Silk.

It is possible that before long all bank notes will be printed, not on paper, but on silk of a particular shade. It is by means of photography that most clever bank note forgeries are ef- fected. A company held a private de- monstration recently when Mrs. Ernest Hart explained a new process which she has invented for waterproofing fabrics without rubber and dyeing them in the same operation. By utilizing this process linen, cotton, or other material can be put into one end of a machine white and brought out a few minutes later colored, waterproofed, and dry! Each machine treats 480 yards in a day, and the materials produced are useful in hundreds of trades, from building aero- planes to bank note making. As regards the latter, the material produced is of such a color that it cannot be photo- graphed.

Moszkowski's Wit.

"Moritz Moszkowski is not only a great pianist," says the Paris Mene- strel, "but a clever wit." Among the things which the writer then relates to prove the assertion are these: "They say that the greater part of modern music is good, but that it sounds badly. I can subscribe to only half of the paradox." "Rubinstein once said 'the false notes which I struck in the course of six recent concerts were suf- ficient for a seventh.' Rubinstein is dead, but that seventh concert is still with us."

"Fish Walk" Tea.

The "Fish Walk" tea is the latest fad of the smart set, the Duchess of Manchester being responsible for its in- troduction to London society. There is no denying that the dance has "caught on," and even portly dowagers indulge in it. These declare that the method of practising, which consists of skipping upstairs in order to attain just the right kind of skip required for the dance in the ballroom, is the most ef- fective weight-reducing exercise they have struck as yet.

Ambition.

Uncle Horace (who is something of a sage and philosopher)—My boy, it is time for you to think seriously of the kind of future you intend to map out for yourself. To sum it up in a word, what epitaph are you anxious to have engraved upon your tombstone? Nephew just beginning his career—"He Got His Share."—London Tele- graph.

Incorporated.

"Dearest, take no stock in these re- ports you hear. You have a monopoly on my affections."

"John, I will trust you forever."

"Love, let us combine."

Whereupon she went into the hands of the receiver, and the bonds of mar- riage soon followed.—Stanford Chap- arral.

When They Cost.

A bird in the hand is worth two in the bush, but both are dirt cheap com- pared with one on a hotel menu card.

Regularity

of the bowels is an absolute neces- sity for good health. Unless the waste matter from the food which collects there is got rid of at least once a day, it decays and poisons the whole body, causing biliousness, in- digestion and sick headaches. Salts and other harsh mineral purgatives irritate the delicate lining of the bowels. Dr. Morse's Indian Root Pills—entirely vegetable—regulate the bowels effectively without weak- ening, sickening or griping. Use

Dr. Morse's Indian Root Pills

ment of riflemen apparently appreciating the living soldiers. These are supposed to be on the defensive, and fire rapidly at the moving figures on the screen. The effects of this fire are carefully noted, and the lessons learnt from it are said by those who ought to know to be more valuable than those learnt from actual manoeuvring, where only blank cart- ridge is usable.

For advertising purposes there is no limit to the moving-picture possibilities. Newspapers and many railways have al- ready adopted it, with strikingly ad- vantageous results. Many of the pic- turesque towns and health resorts in the States have been filmed for this pur- pose, and one or two of our English re- sorts have followed suit.

For police purposes the cinema is extensively used in several foreign countries. Films of a riot were taken in Buda Pesth, and many of the rioters paid visits to the picture palaces to see themselves screened. Alas! so did the police, and the riotous ones, recognized from the pictures, were promptly ar- rested.

The bank messenger, Bruning, who lifted £13,000 from the Dresden Bank last year, had his photograph shown in two hundred and fifty palaces by order of the police. A man hasn't a chance of escaping under these conditions!

Even the Mormons have utilized the film in their endeavors to secure con- verts. The story of Mormonism (of course, from the Mormon point of view is told) from the beginning until the present day, \$50,000 has been set aside in order to induce picture palaces to show the film. This would never be al- lowed in England for very good re- reasons. And the cinematograph is still in its infancy!

A Thoughtful Man.

When Thomas Daigle, 149 De Villiers Street, Montreal, abandoned his three- months-old babe in the bushes here on Monday night he was not a heartless man. It was 11.30 at night when a policeman hearing a tiny voice issuing from the bushes, discovered the babe lying flat on its back, clad only in a little shirt and a pair of shoes. He picked it up tenderly and took it to the police station.

In the morning the father, Thos. Daigle, was arrested. He said his wife had deserted him, so he took the child and left it where the officer was sure to find it. Then he waited to see it picked up. When he saw how carefully it was received he knew it would have a good home.

Songs of the Balkans.

The part played by Balkan song in keeping fresh the hatred of the Chris- tians against the Turks in the penin- sula has been very great. Popular poetry in the Balkans has ended by creating one unique hero, Marka Kraljevitich. He is a great warrior, com- bining in his own person the most no- table qualities of William Tell, the Cid, Don Quixote and Pantagruel. He is continually deceiving the Turk by all manner of disreputable stratagems and always justifies the means by success. Marka is a great feudal lord, and he spends his time in challenging Turks to single combat. Hero-like, his suc- cesses are prodigious.

Learn What We Are Ready For.

Emerson never uttered a wiser thing than when he wrote: "No man can learn what he has not preparation for learning, however near to his eyes is the subject. A chemist may tell his most precious secrets to a carpenter, and he shall be never the wiser—the secrets he would not utter to a chem- ist for an estate. . . . Our eyes are holden that we cannot see things that stare us in the face until the hour arrives when the mind is ripened; then we behold them, and the time when we saw them not is like a dream."

to replace hair on the heads of LADIES and GENTLEMEN, who have lost their hair. By his beautiful, natural hair constructions, which are known all over the world, EVERY WOMAN AND MAN, can be made to look younger and have the natural protection to the head, which means, HEALTH, COMFORT AND GOOD APPEARANCE.

Interesting Exhibit.

Among the many interesting features at the Lennox Fall Fair will be a twenty foot space filled with modern appliances used by bee-keepers. Also bees in all stages of development, and bees working behind glass. The exhibitor will be prepared to give demonstrations on the care and management of bees, and answer any and all questions which are sure to be asked by interested persons. Do not forget the Baby Show and band concert, and magnificent display in the palace on the evening of the 16th of September. Admission, 10c.

Two People Injured.

Two people, living at Odessa, were seriously injured in an accident which occurred two miles out of the village on Monday night. The victims of the accident Mrs. Wesley Card and her father-in-law, are both doing nicely. The two were driving, and their horse took fright at a passing automobile. The two occupants of the rig were thrown out on the roadway and both were badly shaken up. It is stated that Mrs. Card, while suffering severely from the shaking up, had no bones broken, but it was feared that her companion had a couple of ribs fractured. The car was coming behind the rig and complaint is made that the driver of the car did not give any warning until he was almost up to the rig. Then it is claimed the horn was sounded, with the result that the horse became frightened and ran away.

Russell—Brown.

At one o'clock, on Monday, Sept. 1st the marriage of Miss Ethel May Brown, daughter of Mr. Robert Brown, formerly of Deseronto, now of Sudbury, to Mr. Fred Russell, of Napanee, was solemnized by Rev. J. P. Wilson, at the house of the bride's sister, Mr. and Mrs. Stanley Wales, Adelphi street, Napanee. The wedding was a very quiet one, only the immediate relatives and friends being present. The bride looked very charming in a gown of palest pink charmeuse with tunic of chiffon and crystal. She carried a sheaf of asters and wore the groom's gift, a pretty necklace of pearls and a "qua marine." Mr. and Mrs. C. W. Moat, Belleville, attended the bride and groom in the ceremony. After luncheon the young couple left by C. N. R. for Toronto and Niagara, the bride going away in a suit of light brown with small white hat. Some pretty and useful gifts are souvenirs of the occasion.

Run Over By Cars.

Sunday afternoon an unfortunate accident occurred at Belleville station whereby Bruce Boyd, the fourteen-year-old son of Mr. and Mrs. Jas. Boyd of Napanee, had his right leg cut off by being run over by a freight train. Early Sunday morning, in company with several other boys, he boarded a freight train at Napanee and went to Belleville. After spending the best part of the day around the city the unfortunate young lad and a couple of companions went to the station to catch a freight train for home. They got on board an oil car and as the train started young Boyd's hat blew off and he jumped off to get it. By this time the train was well under way, and after securing his hat, the young lad raced to get on. He succeeded in catching the train, but the exertion had taxed his strength, and after catching on he was unable to pull himself safely on board, and letting go his hold he fell under the wheels and his right leg was so badly smashed that when taken to the hospital it had to be amputated just above the knee. The young lad also had a bad gash in the back of his head. From inform-

Presentation.

About fifty members of Church Adult Bible Class Synnington Place, on John street presented their teacher with following address, which, after presented by Mr. R. B. Allen, responded to by Mr. Synnington followed by an evening filled with song and incidents that will main bright and pleasing in the memory of all the participants.

ADDRESS OF WELCOME

DEAR TEACHER:—

Our Bible Class met with this occasion to welcome you to our town and Bible Class. While you were away, but did not you in our prayers. While you were enjoying your meeting friends in the home viewing the sceneries endeared in former days, climbing the hills, and viewing the fertile that gave birth to the many sons and daughters of the land of Scotland. You may be proud of the great advance that the old lands have made your former visits, in Art, Agriculture and other products. While your thoughts were westward we were pleading with Pharaoh to let us go a three journey in the wilderness to see to Jehovah, and while you were westward across the Atlantic on a proud liner in peace of comfort, we were all plodding the Red Sea, with Pharaoh's six hundred chariots in hot pursuit trying to surround us and catch back to Egyptian slavery, following our true guide we reached the Eastern shore at same time as you landed in Canaan. So we all meet together this evening to rejoice together at this gathering of teacher and class, and our Heavenly Father's providential care over us all, and you have been renewed in vigor and that we all as a class teacher may study God's word than ever.

Signed on behalf of the Society, MRS. GREEN

WORK OF THE TELEPHONE

Its Magic Has Enabled Us to Straddle Fingers at Space.

Just how modern is the essential ubiquitous telephone—now covers over a half million houses and in New York city there is a line in "Pinafore" which serves to indicate. When the kindly chandelion with Ralph Rackstraw his separation from his Joseph chants these words to picture the error of his lot:

"No telephone connects with a prison cell."

The line falls flat today. But before was produced for the first in 1878, and in 1876 the Bell for the first practical telephone issued. Thus when the word written they related to a new startling invention that was the of the day, and the Gilbertian really a gay, topical jest.

It is a safe guess, however, that few of the people who laugh "Pinafore" in the seventies of what the telephone would really be. The years of the telephone few. But already it has trans-

During the Fair

to replace hair on the heads of LADIES and GENTLEMEN, who have lost their hair. By his beautiful, natural hair constructions, which are known all over the world, EVERY WOMAN AND MAN, can be made to look younger and have the natural protection to the head, which means, HEALTH, COMFORT AND GOOD APPEARANCE.

LADIES do not miss this opportunity. See his Transformations, Switches, Wavelets, Pompadours, Full Wigs, Curls, Etc.

"The Dorenwend Sanitary Patent Toupee."

Gentlemen (who are bald) protect and adorn your bald head with human hair. In order to have a conception of the wonderful achievement in the art of hair constructing, every bald man should call and see the large sample stock of "HAIR TOUPEES and FULL WIGS" which Prof. Dorenwend, will be showing. These wonderful coverings are so natural in appearance that detection is impossible. They are adjusted so securely, to any head, that they cannot come off, except at the wearer's wish. They will give a young and softening expression to the face.

A free Demonstration is extended to all, come and bring your friends to the Paisley House Napanee, on

WED. SEPT. 17th

catching the train, but the exertion had taxed his strength, and after catching on he was unable to pull himself safely on board, and letting go his hold he fell under the wheels and his right leg was so badly smashed that when taken to the hospital it had to be amputated just above the knee. The young lad also had a bad gash in the back of his head. From information to hand he is getting along as well as could be expected.

Trotted Without Driver.

Lady Dillon, bay mare, owned by C. Loyst, of Bath, performed a peculiar stunt during a heat of 2.40 race at Belleville on Monday. The Belleville Ontario refers to the event as follows:

"In the second heat the most remarkable feature of the afternoon took place. Black Bird fell on the track, shortly after the start off, at the south Lady Dillon was close behind and ran into the outfit losing her driver. Lady Dillon extricated her sulky and started on the track without her driver, taking the inside Thenceforth for nearly a mile, twice around the track the intelligent mare raced. Again and again the sulky was in the air, but always righted itself, the animal keeping on her course. Efforts were made to stop her, but she was out to finish. Nothing daunted her. Past the judges' stand she raced the first time. She was passed by one or two drivers, but all the last lap it was a race to the death between the undriven mare and Brimo V., his driver Geo. Nassan. On the home stretch it was a race never witnessed before on Belleville turf. There ran Lady Dillon thoroughly enjoyed the contest. And she crossed the line fourth ahead of Brimo V. However as she did not bring in her driver, she was not counted as having finished. Lady Dillon however won a reputation for herself and her trainer. During the whole mile she never once broke nor had a collision although every one shouted for her to stop. When the race was over, she went down to the south end and as the other horses drew up, she also slackened her speed and allowed herself to be taken care of."

CHEESE BOARD.

Napanee Cheese Board met in Council Chamber, Napanee, on Friday last. Fourteen factories offered for sale 1030 cheese, of which 150 were white and 880 colored. Bidding opened at 13¢ and closed at 13 3/16¢, at which price all the offerings were disposed of as follows:

Mr. Thompson got Union and Excelsior.

Mr. Cleall got Whitman Creek.

Mr. Alexander got Kingsford.

Mr. Cook got Selby, Odessa, Farmers' Friend and Wilton.

Mr. Kerr got Phippen 1, 2, 3 and Marlbank.

Six buyers present.

Children Cry FOR FLETCHER'S CASTORIA

starting invention that was of the day, and the Gilbertian really a gay, topical jest.

It is a safe guess, however, that few of the people who laugh "Pinafore" in the seventies what the telephone would really be. The years of the telegraph, wireless, the automobile helped to make the nineteenth a century of acceleration.

The telephone worked magic than all the rest together discovery of astral bodies would have done more to multiply effectiveness and enable us our fingers at space.—New York.

The Back Number.

I am sitting in the twilight

Gazing at the passing throng

As in bunches and in couples

Down the street it moves a

And I hear the constant babble

From the ceaseless human t

And I watch the lovers spoon

As they did when I was you

Here's a young and tender c

Trading glances on the sly

Far away from home and mo

Having dodged the watchful

And I wonder as they wander

While they chat or softly st

If they understand such antic

And the trouble they may u

How can children be so silly?

I was that way once, I kno

But I cannot be too thankful

I've outgrown it long ago.

They in fancy feel a blessing

Falling from the stars above

When in truth the thing is or

But a case of puppy love.

Let them go if they enjoy it.

I can sit here with my pipe

Making comments philosophic

From experience more ripe.

Do I envy them their pleasure

As they sip the honey dew

From the lips on which it rip

I won't own it if I do.

tion.
At fifty members of Grace
h. Adult Bible Class met at
gton Place, on John street, and
ted their teacher with the
ing address, which, after being
ted by Mr. R. B. Allen, and re-
ed by Mr. Synnington, was
ed by an evening filled with
nd incidents that will long re-
right and pleasing in the mem-
all the participants.

ADDRESS OF WELCOME.

TEACHER:—
Bible Class met with you on
easion to welcome you back to
wn and Bible Class. We miss
hile away, but did not forget
our prayers. While we were
you were enjoying yourself.
g friends in the home land,
g the sceneries endeared to you
ner days, climbing the neather
and viewing the fertile plains
ave birth to the many noble
and daughters of the good old
Scotland. You may feel just-
d of the great advancements
e old lands have made since
rmer visits, in Art, Science,
ulture and other pursuits.
your thoughts were turning
and we were pleading with old
h to let us go a three days
y in the wilderness to sacrifice
ovah, and while you were sail-
astward across the broad At-
on a proud liner in peace and
t, we were all ploding across
d Sea, with Pharaoh and his
nded chariots in hot pursuit,
to surround us and carry us
o Egyptian slavery, but by
ng our true guide we safely
d the Eastern shore about the
ime as you landed in Quebec,
all meet together this evening
oice together at this home-
ing of teacher and class, thank-
r Heavenly Father for His
ential care over us all. Trust-
I have been renewed in health
r and that we all as class and
r may study God's word closer
ver.

ONTARIO POLITICS

"Hope all progressive forces will rally to hearty support of Chamberlain in East York. Let every vote be pulled."

This cable has been received from N. W. Rowell, K. C., M. P. P., Leader of Opposition. It was sent from Alyth, Scotland. Mr. Rowell, who has been in Europe since July is sailing for home but will scarcely be here in time to take part in the bye-election which was brought on by the Government with extreme suddenness. The cablegram was read at the opening meeting of the Liberal campaign at Stouffville on Friday night.

Every voter in the Province by this time knows where the Liberal party stands on two of the most important issues of the day—the abolition of the bar and tax reform. The Liberal party's advocacy of these two measures is being made in co-operation with independent bodies. In the East York campaign, at present, the Dominion Alliance is supplying speakers for various meetings and is helping in the canvass and the Tax Reform League is also placing its speakers at the disposal of the Liberal candidate and are taking the platform with him. The Educational value of such a campaign is enormous whatever the voting result may be and this contest also shows that the Liberal party has the support behind it of independent men.

SPECIAL PRIZES

CONTRIBUTED TO THE LENNOX
AGRICULTURAL SOCIETY FOR
1913.

Gibbard Furniture Co.—\$5.00 fancy Chair, for farmer's son, under 21 years who unharnesses his team and harnesses them and trots once around the track in best time. No straps or breeching.

Directors Special—\$15.00 for best pair twin babies under one year. 1st prize, \$7.00; 2nd prize, \$5.00; 3rd prize, \$3.00.

A. S. Kimmery—50 lbs. Flour for best two loaves of Bread from Five Roses Flour. Bread to become pro-

CATTLE MARKETS

TORONTO LIVE STOCK.

TORONTO, Sept. 1.—Receipts of live stock at the City Yards were 12 carloads, comprising 155 cattle, 42 hogs, 598 sheep, and 24 calves.

Trade in cattle was slow, as they were generally of common to medium quality. Butchers' steers and heifers sold from \$4.50 to \$5.40, cows, at \$3.50 to \$5, calves, \$5 to \$9; sheep, \$4 to \$5; lambs, \$7 to \$7.40.

McDonald and Halligan sold: 55 lambs, 90 lbs. each, at \$7.35; 14 sheep, 140 lbs. each, at \$4.50; 3 sheep, 160 lbs. each, at \$3.50; 4 calves, 160 lbs. each, at \$7.75.

Dunn and Levack sold: 200 lambs, at \$7 to \$7.40 per cwt.; 50 sheep, at \$5 per cwt.; 10 calves, at \$3.50 per cwt.; 2 loads of cattle, butchers', medium, at \$5.40, and cows, at \$3.50 to \$5.

MONTREAL LIVE STOCK.

MONTREAL, Sept. 1.—At the Montreal stock yards, west end market, the receipts of live stock for the week ended Aug. 30 were 2200 cattle, 2900 sheep and lambs, 2975 hogs and 1125 calves. The supply on the market today for sale amounted to 1450 cattle, 2075 sheep and lambs, 1400 hogs and 750 calves.

The feature of the trade today was the demand from American buyers for common small bulls for shipment to Buffalo, and as the offerings of such were large and as the offerings of such were large a fairly active trade was done in this direction at \$3.25 to \$3.50 per 100 pounds. There were also some buyers from Boston on the market, but as they could not secure the class of stock wanted at their price, little business was done for shipment to that market. There was no actual change in the condition of the market cattle, prices being fairly steady owing to the fact that the supply of the top grades was not large, for which there was a good demand from butchers and packers, and trade on the whole was active. Sales of full loads of choice steers were made at \$6.75; good at \$6.25, and fair at \$5.25 to \$5.50 per 100 pounds.

The demand for small meats was good and as the offerings were large an active trade was done. Western lambs were firm at \$6.50 to \$6.75, but the market for Quebec lambs was stronger at an advance of 10c per 100 pounds, with sales at \$6.85 to \$6.95 per 100 pounds. A good many grass fed calves were bought for shipment to Buffalo at 3 1/4c to 3 1/2c per pound, and sales of milk fed stock were made for local account at from \$6 to \$12 each. An easier feeling prevailed in the market for live hogs, but prices showed little change, there being a good demand for selected lots at from \$10.50 to \$10.60, sows at \$8.50 to \$8.60, and stags at \$4 to \$5.50 per 100 pounds weighed off cars.

Butchers' cattle, choice, \$6.75 to \$7; do., medium \$5.25 to \$6.05; do., common, \$4.25 to \$4.50; canners, \$2.75 to \$3.25; butchers' cattle, choice, cows, \$5.25 to \$5.50; do., medium, \$4.50 to \$5; do., bulls, \$4.25 to \$5.50; milkers, choice, each, \$75 to \$80; do., common and medium, each, \$65 to \$70; springers, \$55 to \$60; sheen, ewes, \$4.25 to \$4.50; bucks and culls, \$3.75 to \$4; lambs, \$5.85 to \$6.75; hogs, f.o.b., \$10.50 to \$10.60; calves, \$3 to \$12.

EAST BUFFALO LIVE STOCK.

EAST BUFFALO, N.Y., Sept. 1.—Cattle—Receipts 400; active, 10c to 25c higher. Prime steers, \$8.85 to \$9.10; shipping, \$8.25 to \$8.75; butchers, \$7 to \$8.75; cows, \$3.75 to \$7.50; bulls, \$5.25 to \$7.50; heifers, \$6.50 to \$8.25; stock heifers, \$5.50 to \$6; stockers and feeders, \$6 to \$7.60; fresh cows and springers, active, \$2 to \$3 higher, \$35 to \$90.

Veals—Receipts 1150; slow and 50c lower; \$6 to \$12.

Hogs—Receipts 14,000; active, 25c to 40c lower; heavy, \$8.90 to \$9; mixed, \$9 to \$9.10; porkers, \$8.75 to \$9.10; pigs, \$8.50 to \$8.75; roughs, \$7.50 to \$7.75; stags, \$6 to \$7.25; dairies, \$8.75 to \$9.

Sheep, active and steady; lambs, 14,000; sheep, active and steady; lambs, slow, 25c lower; lambs, \$5.50 to \$7.75; yearlings, \$4.50 to \$6.25; wethers, \$5.25 to \$5.50; ewes, \$2.50 to \$4.75; sheep, mixed, \$4.75 to \$5.25.

CHICAGO LIVE STOCK.

CHICAGO, Sept. 1.—Cattle—Receipts 20,000; steady. Beefves, \$6.90 to \$9.20; Texas steers, \$6.75 to \$7.75; stockers and feeders, \$5.50 to \$7.85; cows and heifers, \$3.65 to \$6.60; calves, \$9 to \$12.25.

Hogs—Receipts 57,000; slow. Light, \$8.10 to \$8.75; mixed, \$7.40 to \$8.70; heavy, \$7.25 to \$8.45; roughs, \$7.25 to \$7.55; pigs, \$3.75 to \$8.50.

PASTOR RUSSELL

London, Aug. 31.—Pastor Russell, of the London Tabernacle, had for his text to-day the words, "The people which shall be created shall praise the Lord; for He hath looked down from the height of His Sanctuary; from Heaven did the Lord behold the earth, to hear the groaning of the prisoners, to loose them that are appointed to death."—Psalm 102:18-20.

The Pastor opened his address with the declaration that the Bible reveals the only God of love and pity. The heathen gods are vengeful, tyrannical, merciless. The picture of God in our creeds, formulated in the Dark Ages, misrepresents Him even more than do the heathen idols. To rid himself of the misconceptions of the Almighty furnished by our creeds and to appreciate the God of the Bible should be the endeavor of every intelligent person.

Next the Pastor called attention to God's sympathy for His fallen creatures, as expressed in the text, and to the fact that it is a direct contradiction of our theories respecting the Divine predestination of more than nine-tenths of humanity to eternal torture. The Lord did not wholly abandon His creatures because of the disobedience in Eden.

Human Wretchedness in God's Sight.

Pastor Russell then described human conditions as they must appear from the Heavenly viewpoint. The sight is terrible—enough to make angels weep. Some are demoted to the extent of wallowing in the mire of sin; some so depraved that they love wrong and hate right; others so weak that they cannot do as they would; many in prisons; hundreds of thousands in hospitals; other hundreds of thousands in insane asylums; thousands of millions gone down into the tomb; with a few, in comparative health, rushing headlong seeking happiness, or fighting and cheating to amass fortunes, which, dying, they must leave. As God looks down, the earth must look like a vast hospital, cemetery, mad-house.

The Almighty foreknew man's wayward course and its penalty of sin and death, and from the beginning planned to rescue man. That rescue is not from a fiery hell of everlasting torture, but from the terrible condition of sin and death in which we find ourselves.

Freeing Death-Appointed Prisoners.

Western Towns Not Bad.

The recent reports, published broad east, of a wide open Fort George, B.C., and the attempt to establish a recognized red-light district are being severely criticized by many interested in the colonization of the northern interior. George J. Hammond, one of the best posted men on the development of that section of the Province, said recently:

"From the sensational reports which have been published, especially in the Eastern papers, the impression is given that Fort George and the other new towns of Central British Columbia are wide open and wild and woolly. As a matter of fact, the citizens of the central interior are just as law-abiding as those of any other section of the Province. Of course, in a new country of big distances, that is just being opened to civilization, where there are thousands of men employed in construction work, the same conditions can not be expected as in the older settled districts.

Ayer's Pills

Good health demands at least one movement of the bowels each day. Just one Ayer's Pill at bedtime. Sold for 60 years. Ask Your Doctor.

LAST BARRIER CUT.

Panama Canal Is Cut Through Into the Pacific.

PANAMA, Sept. 2.—The last remaining barrier at the Pacific end of the Panama Canal was blown up by dynamite yesterday. It was an interesting spectacle. At exactly 9.30 o'clock an electric switch was turned on and a moment later the 1,500 spectators, including the Shriners visiting here, and the officers of the British cruiser New Zealand, were rewarded by a wonderful sight. Hundreds of tons of mud and stones were thrown high in the air; there they hung suspended and then fell back as the thunderous roar of the explosion re-echoed in the nearby hills.

About twenty long tons, equivalent to 44,800 pounds of 45 per cent. dynamite constituted the blast, which was one of the largest ever set off in the canal.

The charge, which was planted in 541 holes at an average depth of 30 feet, tore a big gap in the barrier, but not to a sufficient depth to permit the water to flow through, as the sea level channel was at low tide.

Equally interesting as the explosion was the actual breaking of the barrier in the afternoon, the tide creeping steadily up until it was level with the top of the gap. A workman seized a shovel and made a small trench through which a rill of water trickled. Gradually it widened, until an hour later a raging torrent, with a thirty-five foot fall, poured through an opening 400 feet wide into that part of the canal between Gamboa Dike and Miraflores locks, which had previously been excavated by steam shovels.

Asiatic Cholera In Vienna.

VIENNA, Sept. 2.—Much anxiety has been occasioned here by the discovery of a case of Asiatic cholera. The patient, who came here from Saloniki, is suffering from only a mild attack, according to the official report.

Mexican Federals Defeated.

EAGLE PASS, Texas, Sept. 2.—Official despatches by courier yesterday to Piedras Negras reported that the Constitutionalist general, Villa, defeated Felix Terrazas' Federals recently in Chihuahua and executed 200 volunteers in the Federal force.

Prohibition Prohibits in China. Sixty-seven men have been burned alive there for producing opium.—Cleveland Leader.

An eastern paper says that tombstones of granite are now classed as luxuries. Oh, well, give us the necessities and keep your luxuries.—Cleveland Plain Dealer.

With this country importing \$50,000,000 worth of art treasures yearly, it must keep the factories of Europe working overtime to maintain the supply of old masters.—Duluth News-Tribune.

from the terrible condition of sin and death in which we find ourselves.

Freeing Death-Appointed Prisoners.

Adam's entire race, shackled with sin and under sentence of death, have for six thousand years been marching to the great prison-house of the tomb. They are now entering the prison-house at the rate of ninety thousand every twenty-four hours. God has sympathized with them and has provided a redemption.

The Pastor then demonstrated that as one man's sin brought death upon humanity, so Divine Wisdom has arranged that a Saviour should give Himself a Ransom for Adam and his race. This has already been accomplished in Christ's death. But this is only the beginning. The thousands of millions of Adam's children must actually be set free from sin and death conditions. But life must be restored ere they can profit by the Redeemer's sacrifice.

The New Creation.

Pastor Russell declared that God's benevolent design for the re-creation of humanity began its work at Pentecost, in His acceptance of the Church and the begetting of its members by the Holy Spirit. This work will continue until the entire number of the fore-ordained New Creation shall have been exalted by the power of the First Resurrection.

These will be a kind of first-fruits to God of His creatures. The after-fruits will be much more numerous, though less choice in quality. Again, the Church now being selected is "the Church of the First-born, written in Heaven." The inference is plain that there will be after-borns.

In the Regeneration Times.

Then the Pastor showed conclusively from Scripture that the reign of Christ's saints is the long-promised Millennium, or thousand years of righteousness, during which Satan will be bound. St. Peter shows that then will be the time of human Restitution to the original perfection, lost by Adam's disobedience, redeemed by Jesus' obedience. All the willing and obedient will be raised out of sin and death—re-created in God's image. This is the resurrection of the unjust, mentioned in St. Paul.

The rest of the dead—aside from the Church, constituting the First Resurrection—will not live again until the thousand years of the Messianic Kingdom are finished. St. Paul declares that the groaning creation shall be delivered from the bondage of corruption—slavery to death.

Idol's Eyes Covered.

While repairing a temple the Chinese cover up the eyes of the idols, in order that the deities may not be offended at the sight of the disorder.

He Couldn't.

Fifty pigs were burned to death near Needham Market. Pity the owner could not "save his bacon."

A Dangerous Horse.

The fact that a race horse is named Nettle seems to indicate that it requires careful handling.

Automobile Runs.

Suggestion to chauffeurs: Why not treat the pedestrian as mere trespasser when he attempts to use the streets?—Chicago Record-Herald.

The driver of an automobile is called a chauffeur by those who ride with him, but what pedestrians call him is a lot easier to spell.—Chicago News.

The statement that there are 100 automobile bandits in New York is surprising only in that the number is placed at only 100.—Washington Herald.

Ruskin as a Patient.

Matlock, so dear to John Ruskin, brought him within sight of death in 1871. It was a wretched, wet summer; he went out in a miserable morning to paint, took a chill, and aggravated the internal inflammation that followed to a dangerous degree by refusing to take the doctor's medicines. The sequel is delightful. Irritated at the doctor's remonstrances, he demanded what was the worst thing he could take. Beef, they told him, and beef he insisted upon having at once. It was late at night and Matlock was scoured for some time before beef could be found. Then, says Mrs. Arthur Severn, he "enjoyed his late supper thoroughly, and, though we all waited anxiously till the morning for the result, it had done him no harm. And when he was told pepper was bad for him he dredged it freely over his food in defiance."

The Least He Might Do.

Little Faith was possessed of a most friendly disposition, but had not yet reached the age where she could understand the silence that may wrap itself around a wordless intimacy. In fact, she demanded speech, frequent and loving.

One night her brother was studying most assiduously his arithmetic lesson, and after calling to him several times without receiving an answer, she appealed to her father.

"George is busy," said father.

"I know," replied Faith, "but he might at least have said, 'Shut up.'"—Woman's Home Companion.

A Strenuous Statesman.

Charles James Fox, the English statesman and sport, had wagered something about a waistcoat which could only be obtained in Paris; went off to Dover by night, caught the mail packet, posted to Paris and back to Calais, and remembered he had a horse racing at Newmarket. He chartered a fishing boat bound for the eastern counties, just got to Newmarket in time for the race, took the post back to London and stopped on the way to dine. In the middle of the dinner he was caught by a special messenger who had been tearing over half of England in search of him and reminded that he had to move to bring in a marriage bill in the house of commons. He rushed to the stables, reached the house in time to make a brilliant speech in reply to North and Burke and defeated North on a division by a single vote.

Almost Recognized.

Dinah was a product of New Orleans, a big, plump "yaller gal" who could cook the finest dinners for miles around. One day a new butler appeared upon the scene, and Dinah's mistress noticed that she took a great interest in the man. At last her mistress could stand her curiosity no longer and asked:

"Dinah, do you know that new man?"

Dinah took another long and scrutinizing look and then slowly and remissly replied:

"Well, I dunno, Miss Alice, but I think he was ma fust husband!"—Evening Post.

DARING SHOOTERS**Moonlighters in the Early Days of Our Oil Wells.****FORCED TO WORK IN SECRET.**

These Bold Spirits, to Dodge the Owner of the Patent Method of Shooting Wells, Had to Operate at Night—Men and Machinery Often Annihilated.

One of the most dangerous and at the same time romantic phases of the early oil business was known as moonlighting. In the beginning of the oil excitement a certain man held the patent on the method of shooting the wells. Having a monopoly of the trade, he could and did charge whatever price he saw fit.

As a result of this condition of affairs there sprang into existence a number of bold spirits who began the manufacture of nitroglycerin, the explosive used, and shooting the wells for much less money than the patent holder charged. They were forced to use the greatest secrecy in their work, for the patent holder had men employed for the express purpose of spying on all the wells drilled. A stiff fine for the first offense and a prison term for the second were the punishments inflicted on the man unlucky enough to get caught. These outlaw shooters had their plants for making the glycerin located in some out of the way spot and when their services were required did their shooting by moonlight, hence the name moonlighter.

Many and varied were the adventures that befell these moonlighters. A driller coming out from town to a well one day saw a can half hidden in a fence corner and stopped to investigate. Taking off the lid, he saw what he supposed was lard oil. Well pleased with his find, he took it along with him. He showed his treasure to his mates at the well and then used some of it to lubricate the engine. For some reason the men were called from the vicinity of the derrick. They had got but a short distance when there was an explosion that fitted the costly engine for the scrap heap. A close inspection of the supposed lard oil revealed the startling fact that it was nitroglycerin. It was a frightened lot of men who gingerly returned the can to the fence corner from which the driller had taken it.

It proved to be the property of a moonlighter, who had left it there, intending to return for it that night.

In so dangerous an occupation as moonlighting many fatal accidents were to be expected. I recall very distinctly two that occurred within a short time of each other.

In the first, the moonlighter, a big blond Swede, had come straight from his wedding to the well. The liquor he had been drinking in celebration of his marriage had ruffled his usually placid temper. He had filled the shell with the glycerin and was endeavoring to slip the cap into place. His hands were a trifle unsteady, and he fumbled it several minutes. Finally, losing his temper, he roughly jerked

WILY KING EDWARD

Foiled the Rebellious Welsh Prince of Wales.

After a lifelong struggle with Welsh, Edward I. of England to ascertain the cause of their rebellion and was informed it would never be content until it a prince of their own.

The wily old monarch asked a prince born in Wales who could speak a word of English would satisfy, and they received it with great enthusiasm, presuming the king meant one of their own blood.

His queen, about to give birth, was hurried to the famous Harlech castle, where Edward I., the first prince of Wales was born. Thereupon King I. carrying the newly born babe in his arms, descended the castle, and to the multitude: "Here is your prince, born in your own country, who speaks no word of English and who, you, shall be reared by a Welsh mother and shall learn your language from her." Accept you him as your prince!

In all the six centuries into the present Prince of Wales and the king of England was invested same spot as his predecessor of 1800 ago.—T. Owen Charles in Magazine.

HEAT AND THE BO

We Are Able to Drink Liquids That Would Scald Our Hands.

The human body can stand greater heat if it be dry than wet, and, strangely enough, stand far hotter liquids inside out.

For example, the average temperature of the human body is 98.6 degrees F. in the shade and 100 degrees F. in the sun. While 151 degrees F. has been registered. In the Gulf of Mexico the thermometers on ship between 122 degrees and 140 degrees F. cent explorer in the Himalayas reported that he found at 9,000 feet an altitude a temperature of 131 degrees F. Bleyden and Chantrey, two fish scientists, desiring to know how high a temperature the body could stand, shut themselves in an oven, of which the heat was gradually raised and they were able to stand it until the thermometer registered 140 degrees F., the boiling point of water.—St. Louis Post-Dispatch.

In parts of central Australia live in an average temperature of 140 degrees F. in the shade and 145 degrees F. in the sun. While 151 degrees F. has been registered. In the Gulf of Mexico the thermometers on ship between 122 degrees and 140 degrees F. cent explorer in the Himalayas reported that he found at 9,000 feet an altitude a temperature of 131 degrees F. Bleyden and Chantrey, two fish scientists, desiring to know how high a temperature the body could stand, shut themselves in an oven, of which the heat was gradually raised and they were able to stand it until the thermometer registered 140 degrees F., the boiling point of water.—St. Louis Post-Dispatch.

FRUIT FED RATS OF UGANDA.
By the Natives They Are Regarded as a Dainty Dish.

The idea of eating rats is so repulsive to us that we cannot imagine a thing unless one were driven to starvation. The people of Uganda, however, eat rats not from need but because they like them. T. of Uganda, however, is very d

COUNTY OF LENNOX AND ADDINGTON**Treasurer's Sale of Lands for Taxes.**

COUNTY OF LENNOX AND ADDINGTON } BY VIRTUE OF A WARRANT under the hand of the Warden and seal of the County of Lennox and Addington, bearing date the 31st day of July, A. D. 1913, and to me directed, commanding me to levy upon the lands mentioned in the following list for arrears of taxes due thereon and the costs as therein set forth.

I hereby give notice that unless the said arrears and costs are sooner paid I shall proceed to sell the said lands, or so much thereof as may be necessary for the aforesaid taxes and costs, at the Court House, in the Town of Napanee, by Public Auction, on MONDAY, THE 24th DAY OF NOVEMBER, AND THE FOLLOWING DAY, IF NECESSARY, in the present year of A. D., 1913, beginning at the hour of ten o'clock in the forenoon, and in compliance with the provisions of the Assessment Act.

The public will please remember that this is a strictly CASH sale. Private cheques will not be accepted in settlement unless marked by the bank upon which they are drawn.

Non-patented or any lands in which the Crown has an interest are sold subject to these provisions.

MATTHEW RYAN, Warden. W. J. SHANNON, Treasurer of the County of Lennox and Addington.
County Treasurer's office, Napanee, July 31st, 1913.

MATTHEW RYAN,

Warden.

W. J. SHANNON,

Treasurer County of Lennox and Addington

County Treasurer's Office, Napanee, July 31st, 1913.

First published in THE NAPANEE EXPRESS, at Napanee, in the County of Lennox and Addington, on August 22nd, 1913.

he had been drinking in celebration of his marriage had ruffled his usually placid temper. He had filled the shell with the glycerin and was endeavoring to slip the cap into place. His hands were a trifle unsteady, and he fumbled it several minutes. Finally, losing his temper, he roughly jerked the cap into place and struck the percussion cap a heavy blow with his fist.

There was a crash that shook the very earth. The derrick and everything in it was blown to flinders. The men who had been watching the operation were instantly killed.

Some time later another terrible accident happened. The moonlighter was a young fellow and noted for his careful work. The well he was to shoot had made a fine showing in the sand, and the owner confidently expected a gusher. The shot was started down, and everything seemed to be going all right. There were several men in the derrick, and a tool dresser stood waiting for the shot to reach the bottom of the well when the piece of iron he held in his hand, which was called the go devil, would be sent down to set it off. The moonlighter let the rope, which was stretched taut by the weight of the heavy shot, run through his hands. Suddenly the rope slackened. He knew only too well what that meant. The gas in the well was forcing the shot back out.

"It is coming out! For God's sake help me catch it!" he yelled to the tool dresser.

With a shriek the tool dresser fled, and the others, knowing their terrible danger, followed him. The shooter, prompted by the mad hope of catching the shell as it came out and thus averting the disaster, stuck to his post.

There came a deafening explosion that reduced the derrick to a mass of kindling wood. The boiler and engine were twisted wrecks. Strewn upon the ground were the mutilated remains of what had been so short a time before strong men. The moonlighter, who had tried with such desperate courage to save them, had been completely annihilated.

Nitroglycerin is when handled in broad daylight and under most favorable conditions a dangerous article. How greatly the danger was increased by handling it as the moonlighters were compelled to may easily be understood. It was without doubt a most hazardous occupation, but the excitement connected with it, to say nothing of the large amount of money received for their services, proved irresistible to the reckless and daring fellows who became moonlighters.—Pittsburgh Dispatch.

The archer who misses the target turns to himself and not to another for the cause of his failure.—Confucius.

Defining the Oyster.
"Now," asked the teacher, "who can tell me what an oyster is?"
Silence for a moment, while small brows were knit in strained effort at remembrance. Then little Tommy's facial muscles relaxed, and eagerly he raised his hand.

"I know!" he triumphantly announced. "An oyster is a fish built like a nut."—Everybody's.

A Dainty Dish.
The idea of eating rats is alive to us that we cannot imagine a thing unless one were driven to starvation. The people of Uganda, however, eat rats not from but because they like them. of Uganda, however, is very from the little creature the holes in our cupboards. Th much larger. It is more the long and is therefore quite a that animal and as well worth as a rabbit.

The wonderful thing about it that it has two mouths, one b other. The first mouth has ratlike nose and is furnished rows of sharp white teeth, w it bites off its food and passe the second mouth, which is pl above the throat. This mouth two rows of teeth, but one lon tongue serves for both sets of

SAW RECORD OF PAST

ENGLISH LADIES HAD QUEER EX-
PERIENCE NEAR PARIS.

Two Tourists at Versailles When Visit-
ing the Petit Trianon Saw People
Running About in Quaint Costumes
of Over a Hundred Years Ago—One
of Them Also Saw Marie Antoinette
Sketching in the Garden.

The strange experiences of two Eng-
lish ladies at Versailles twelve years
ago, an account of which caused con-
siderable discussion when published
shortly afterwards, under the title of
"An Adventure," are again recounted
in book form, with appendix, maps and
notes.

These ladies, who do not disclose
their real names, but write under the
signatures of "Elizabeth Morison" and
"Frances Lamont," were on a visit
to Paris in the year 1901, and one af-
ternoon in August went by train to
Versailles. After "doing" the palace
they decided to have a look at the
Petit Trianon. They were strong-
minded, healthy, practical, well-edu-
cated women, not at all imaginative
or subjects to hallucinations. After
passing the Grand Trianon they both
felt an extraordinary sensation of de-
pression and unreality creeping over
them, for which there was absolutely
no reason.

Farther on they heard the sound of
someone running in great haste, and
suddenly a young man, who appeared
to be greatly excited, walked by their
side. His face was glowing red, as if
from great exertion, and he called out
excitedly that they were not to go that
way, but round by the house, and then
completely vanished. He was dressed
in an old-fashioned costume such as
was worn a hundred years ago. Where
he went was a mystery—he simply dis-
appeared.

They continued their way in sil-
ence, greatly mystified and oppressed
with an uncanny feeling. They came
to a square, solidly built house, the
long windows of which were shut-
tered. On a terrace in front of the
house a lady was sitting, apparently
engaged in sketching. She saw them,
and when they passed turned and
looked at them. It was not a young
face, but rather pretty.

She had on a shady white hat perched
on a good deal of fair hair that fluffed
round her forehead. Her dress was
very old-fashioned and of the style
worn before the French Revolution.
From pictures and written descriptions
of Marie Antoinette afterwards obtained,
they found that this lady was the
exact counterpart of the unfortunate
Queen who had lived in that place
more than a hundred years before.

Her dress puzzled them at the time,
but they put her down as a tourist
with rather eccentric ideas about
clothes.

They crossed the terrace to the south-
west corner; then, seeing that one of
the windows was unshuttered, turned
to go towards it, but were interrupted
by a young man suddenly coming out
of a door, which he banged noisily be-
hind him. He called out to them that
the way into the house was by the Cour
d'Honneur and offered to show the
way. He looked inquisitively amused
as he walked by them till they came
to an entrance in the front drive.

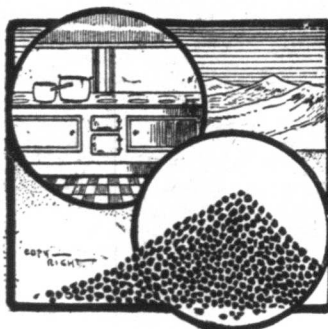

In the front entrance hall they met
a French wedding party, who walked
arm-in-arm in a procession round the
rooms. Here the creepy, uncanny
feeling which had haunted them all
the afternoon left them as suddenly
as it had come, and they felt quite
lively again. Coming out of the Cour
d'Honneur, they took a carriage which

a French wedding party, who walked arm-in-arm in a procession round the rooms. Here the creepy, uncanny feeling which had haunted them all the afternoon left them as suddenly as it had come, and they felt quite lively again. Coming out of the Cour d'Honneur, they took a carriage which was standing there and drove back to Versailles and had tea.

The strange and remarkable part of it all is that the scenes they saw, the people they met, the places they passed through—with the exception of the Petit Trianon—did not really exist. This was conclusively proved later. Researches, extending over several years, showed them that the scenes they saw and the persons they met had existed at the time of the French Revolution more than a hundred years before.

They visited Versailles many times afterwards, and were never able to find the places they had passed through that afternoon; everything was quite different from what they had then seen. They happened to find that door again, but it had not been opened for more than fifty years, and there was no flooring inside the building, showing that it was quite impossible for any one to have come through even if the door could have been opened.

The only explanation of the phenomena is found in the occult doctrine of the astral light which is now finding favor with many leading scientists. The results of psychometric experiments by which a clairvoyant can see scenes v-nected with the history of a given object, seem to indicate that the emanations of light from any object photograph its surroundings upon it. Any place possesses therefore, an indelible photograph in the ether of any event which has occurred there and in exalted or psychic states these pictures become visible to the ordinary person. This astral record was known to the older mystics as "The Book of God's Remembrance," and in the theory one finds the most satisfactory explanation of the Versailles incident.

Spoonerisms.

The announcement that Miss Spooner, a daughter of the Warden of New College, Oxford, is engaged to be married, has recalled some of the stories that are told of her famous father.

Dr. Spooner has enriched the English language with a new word, "Spoonerism," which is used to describe a transposition of letters or words in a sentence. The Warden is rather prone to this form of mistake, and he is said to have once asked a cabman: "Can you give me change for a peeshilling tooce?"

The "Alleged Gentleman."

This quaint notice was recently posted in a Sardiff club: "If the alleged gentleman who took three brushes from Mr. —'s color box imagines they will paint poultry without the assistance of the master hand he is gravely mistaken and therefore may as well return them to their rightful owner."—Pall Mall Gazette.

Why Married Men Live Long.

The reason a married man lives longer than a single man is because the single man leads a selfish existence. A married man can double his pleasures. Any time he has a streak of good luck it tickles him all over, but it makes him feel twice as good when he tells his wife about it. And she is so pleased and proud that he feels like a two-year-old. There isn't a chance in the world of a man's arteries hardening or his heart weakening when he can get a million dollars' worth of pleasure out of making his wife happy.—Cincinnati Enquirer.

Manitoba Farms ! !

Selected improved lands, convenient to schools and churches. Good roads and all near Killarney, Manitoba.

Look over the list, and if you contemplate going west, examine these lands:

540 acres—Level lands, fair buildings, good windmill and chop house. 280 acres cultivated; situated on shore of 16-mile lake, three miles from town. Plenty water, has lake frontage, plenty wood. Make splendid home, very pretty in summer. Price \$30 per acre, half cash, or will consider cash deal.

100 acres good land—100 acres cultivated, 34 miles from town, 1½ miles from siding on C. P. R. Buildings, small house and stable. Price, \$30 per acre, small payment down, and balance on time.

320 acres—Black loam land, clay subsoil. 210 acres cultivated, balance hay and pasture. Buildings, barn 34 x 46, house, five rooms, 3 granaries, 1 drive shed. Water, running stream through pasture. Situation, one mile from siding, six miles from Killarney. 5000 bushels grain raised on this farm 1912. Terms, \$35 per acre, ½ cash.

320 acres—215 acres cultivated, 40 acres pasture. House, small frame. Stable, 36 x 74, stone foundation, granary, 20 x 30. Good well, wood on place. Land, slightly rolling, very few stone. Situation, 2 miles from Killarney. Price, \$35 per acre, \$4000 cash, balance on easy terms.

320 acres—Rolling land, rich black loam, clay subsoil. Situated 2½ miles from G. N. R. station and C. N. R. running along north quarter, with siding

and loading platform ¼ mile distant. Market town 4 miles west and market town 4 miles east. The land lies directly in V of these two great railroads. House and stable. 125 acres cultivated, balance new land can all be broken, 160 acres fenced. Real snap, only \$25 per acre.

¼ section—160 acres, unbroken land. Situated five miles from Killarney, three miles from a good town east of Killarney. 130 acres can be broken. Price, \$20 per acre, small payment down and balance on terms with agreement to improve.

640 acres—First class land, 400 acres cultivated, fenced into fields. The best of water, well and running stream. House, 18 x 24 and kitchen. Barn 50 x 70, stone foundation. Granary, 26 x 36, on stone, implement and drive shed and hen house. All buildings painted and in good shape. Granary, 16 x 24, granary 12 x 16. School across road from farm, railroad stations two miles and five miles. Price, \$38 per acre. This is an ideal farm. No one could wish for better. Has produced \$3300 per year for last six years in grain only.

640 acres—Good land, 450 acres cultivated, 50 acres fenced. Running stream, wooded banks. House and two stables, granaries, two. Price \$25 per acre.

THE

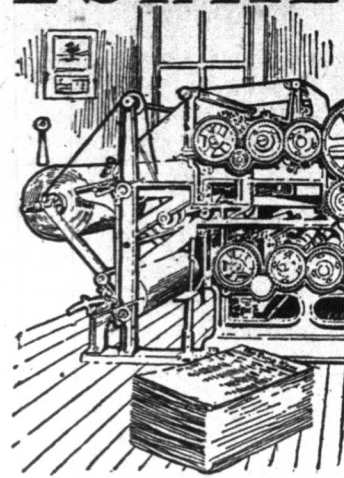

FOURTH

ESTATE

Novelized by
**FREDERICK
R. TOOMBS**

From the Great Play
of the Same Name
by Joseph Medill
Patterson and Har-
riet Ford.

COPYRIGHT, 1909, BY JOSEPH
MEDILL PATTERSON AND
HARRIET FORD.

In "The Fourth Estate" the effectiveness of newspapers in fearlessly exposing political and judicial corruption and the safeguard they are to the public are interestingly and convincingly set forth. A young, earnest newspaper writer and editor is the central figure, and his battles with a dishonest United States judge against big odds and against the cunningly underhanded machinations of the lawyer lobbyist Dupuy form one of the most valuable as well as most entertaining pieces of fiction of the day. That the false judge's daughter, the reigning beauty in the fashionable life of a leading city, should play a sensational part in this gripping story of strong honest men and of strong dishonest men, fighting each other in a war of dollars, evidences the romantic possibilities of the narrative. This is a story of today's America, a fact story torn out of life's book, dealing with the most vital issues that confront every one of us. Romance and humor vie with stirring action for supremacy in this instructive and fascinating novel, which teaches that the path of duty is the path to love and happiness and that in success, nobly won, lie rewards of greater and more lasting value than in a triumph ignobly and more easily gained.

CHAPTER I

Burke said there were three estates in parliament, but in the reporters' gallery yonder there sat a Fourth Estate more important far than they all.—Carlyle.

THE silence in the managing editor's room of the Daily Advance was abruptly broken by the entrance of Ross Mc-

man eloping with his daughter-in-law; very fine people. Another first class murder from St. Louis. Local has twenty-six scheduled, sports are very heavy, bowling, fights, checkers, and Kentucky's shut down on racing; they want two pages. We've got a tip that Morgan has the asthma. Steel will probably open soft on Monday."

McHenry took down the telephone receiver and held it expectantly at his ear. He took the proofs from Moore's hand and began looking them over. They contained important articles which had been set up, but which he had not previously seen.

"Hello, there's a live one," he suddenly exclaimed, glancing over one of

McHenry turned to the telephone.

the sheets. "Bill, I'd like to run that one. Senator Deering dead yet?"

"No, not yet."

The managing editor was disgusted. "Pshaw!" he exclaimed. "I'll bet the old codger dies for the afternoon papers. We're having rotten luck lately."

The telephone rang.

"Hello! Who's this?" cried McHenry savagely. But his voice changed abruptly to its most sugary tones.

McHenry rang for the boy, Durkin, and on his belated arrival sent him to summon the city editor. "What you got?" saluted McHenry as the editor arrived.

Downs, the city editor, went straight to the point.

"Are you going to use that follow up story about Judge Bartelmy throwing the Lansing Iron company into a receivership?" he queried.

"I dunno. Any kicks on this morning's story?"

"I should say yes—telephone going all day."

McHenry turned and pounded the desk with his fist.

"If they kicked on that they'd get our jobs on this."

He pointed at the proof of the new Bartelmy story—

which he had taken from Moore.

"All the same, the judicial ermine is getting rather soiled these days. It makes me sore to think of what they're pulling off on the federal bench. He's bad all through, that Bartelmy. Whose story is it—Brand's?"

"Yep," responded the city editor.

"By heaven, he is a newspaper man."

"That's why he won't last in this office," put in Moore sarcastically.

"Yep," supplemented the city editor.

McHenry's face took on a resigned expression as he said: "Well, we'll have to pass it up." He paused. "It's likely to be libelous."

He laid aside the proof sheet and resumed his perusal of the schedule of articles intended to be used in the next morning's paper.

"How about divorces?" McHenry asked suddenly, raising his head to the city editor.

"The Sarrup divorce is up again. Two new correspondents named." He pointed them out among the photos.

McHenry drew a few lines on one of the photos and rang for the boy. "Bring me an artist, Durkin," he ordered. The artist soon appeared.

"Here," spoke up the managing editor, "take these correspondents and run them with the two new bad notes."

time, but as he rose to meet Bartelmy and surveyed this lionably gowned young woman made a mental note that she surmounted them all. Her blond features were distinctly patrician cast. Her eyes had the magnetic qualities vied by the many less fortunate men, and the pure whiteness of finely curved chin and neck was advantageously revealed by the low collar of her princess gown of colored silk which clung to a that celebrated artists had pronounced unusual in its symmetry.

"I desire to complain about a title attacking my father this morning," the girl began.

"Yes?" answered McHenry.

"I wish an apology for it."

"Is this a message from your father?"

"That's not the point. This is the first time in his life that any one ventured to question his honor. The article is false, and I think you should apologize for it in the paper."

"Before saying as to that," replied the managing editor, "I should like to refer the matter to the newspaper, Mr. Nolan. You know not customary for a newspaper to take back what it says."

The judge's daughter raised her brows in surprise as she drew from McHenry's desk, where he had placed his seat.

"I should think you'd have a many lawsuits," she suggested.

"Oh, no; not many. We go up line, but we try not to step on it. He picked up several newspapers from his desk. "For instance"—scattered the papers—"I don't think you will feel inclined to sue us." He as if to end the interview.

Judith, however, was not to be disposed of.

"I don't want to detain you," she marked, "but I should like to ask who was responsible for that article. She seated herself in a chair. McHenry indicated.

"We never tell the name of our editors," answered the managing editor.

Her father had diplomatically suggested to her that Wheeler Brand had written the story. This she found difficult to believe. But she was convinced, and one of her motives in visiting the newspaper had been to ask him—to ask him to tell her it was not the author of the new one on her father. She must see him learn the truth from his lips alone.

"Is Mr. Brand in the office now?"

"Yes, I think so."

"Would it be possible for me to see him?"

"Why, yes, if you wish. I'll go for him."

McHenry summoned the boy and told him to "ask Mr. Brand to come in."

"We've noticed"—she hesitated as her friends have noticed that he coming very radical lately." She rose from the chair and stepped boldly toward the editor's desk.

"Oh," he laughed, "they all go when they're young, like the me."

"And that's something they're over, isn't it?" she asked eagerly.

"Yes," responded McHenry, as though to leave the room.

Judith stepped squarely in front of his desk.

"But I don't want to disturb you. Can't I go to his office?"

"Double divorce. They exchanged partners."

lates in parliament, but in the reporters' gallery yonder there sat a Fourth Estate more important far than they all.—Carlyle.

THE silence in the managing editor's room of the Daily Advance was abruptly broken by the entrance of Ross McHenry through a private door. His eighteen years of active newspaper work in a career extending from cub reporterhood to his present important office had drilled into him the necessity, even the habit, of constant action, quick thought, keen and accurate perception and readiness for emergencies. He hastily threw off his coat, glanced at several papers laid on his desk while he was out at dinner and seated himself in his managerial chair. He wrote a few rapid words on a pad of paper at his right hand as he pushed a button with his left to summon an office boy.

"Any one here while I was gone?" McHenry queried sharply as the boy entered.

"Yes, sir. Woman whose boy was pinched wants to keep it out of th' paper. Been outside two hours. She's sittin' outside an' bawls an' bawls an' bawls."

"Tell her we're printing a newspaper and I've left for the night."

"Then there was a few phone calls. We handled 'em all 'cept th' last. He was a man named Nolan, an' he wanted ter see you."

McHenry immediately became interested.

"What'd you tell him?" he asked, rising.

"That you was to th' theayter."

The managing editor picked up a Congressional Directory and shielded it forcibly at the lad.

"Well, next time, young man, you tell him I've just stepped down to the night editor's room. Nolan; remember his name—Nolan. He's the new owner."

"Cheese it, another owner. Nobody keeps us long, do they?"

"No," responded McHenry laconically. "Like certain other luxuries, nobody keeps us long. We're too expensive, Durkin."

The boy grinned and hurried away to summon the night editor at McHenry's command and to dispose of the "bawling" woman.

McHenry seated himself and turned to the ever ready telephone at the right hand corner of his desk:

"Hello, Miss Stowe! Get me Mr Nolan—Mr. Michael Nolan—on the wire right away."

As the managing editor hung up the receiver Moore, the night editor, entered carrying a bundle of galley proofs in his left hand, a schedule in his right.

"Well, Moore, what have you got for part 1?" asked McHenry.

The night editor repeated rapidly in a dead flat monotonous voice:

"Thirty-five columns of ads. Telegraph editor's boiling for twenty columns. He just got a couple of nice fashes—one from Pittsburg about a

The managing editor was disgusted. "Pshaw!" he exclaimed. "I'll bet the old codger dies for the afternoon papers. We're having rotten luck lately." The telephone rang.

"Hello! Who's this?" cried McHenry savagely. But his voice changed abruptly to its most sugary tones.

"Oh, Mr. Nolan, this is Mr. McHenry. Yes; why, the boy said I'd gone to the theater. He's new to newspaper offices. Yes, indeed. He doesn't know we newspaper men have little time for theaters—no, indeed—ha, ha! I was downstairs in the press room all the time—yes, indeed; trouble with the roller on cylinder 5 of the color press, and I happen to have a bit of a mechanical turn of mind—yes, indeed. Anything I can do for you, sir? Hope we may have the pleasure of showing you over the office—your office—pretty soon. Yes, sir. Tonight? Yes, any time. We're always here. Yes, sir. Thank you."

He hung up the receiver and reverted to his natural voice. "It's the new boss, Moore. 'S coming down tonight."

"I wonder if that means more changes?" observed the night editor as he filled his pipe.

McHenry sighed.

"Ain't a man who gets into this business a sucker?"

The night editor smiled grimly.

"Wonder what kind of a joke is this Nolan anyway?" he asked.

The night editor's brow wrinkled.

"All I know is that he's a Colorado miner, with a hill of ore all his own." He glanced over the night editor's schedule. "What is this T—T—golf or politics?"

"Taft—both; golf 2 down—conference with Aldrich."

McHenry snorted.

"Gosh, the White House is dead since Teddy left!" He pointed to the schedule. "What's this? 'Baltimore, one column.'"

"Double divorce. They exchanged partners."

"Good people?"

"Not much."

"Fifty words 'll be enough. Dead heavy—stupid paper," granted the managing editor.

THE HIRED GIRL HAS WENT.

SHE WAS HIRED,
SHE WAS TIRED,
SHE WAS FIRED.

BUT SMILE—You can get another by using our WANT AD. columns.

two new correspondents named." He pointed them out among the photos.

McHenry drew a few lines on one of the photos and rang for the boy. "Bring me an artist, Durkin," he ordered. The artist soon appeared.

"Here," spoke up the managing editor, "take these correspondents and run 'em with the two you had yesterday, but fix those up different. Put a hat on one and the other in low neck, and put Sarup himself in the middle with a dado of hearts around." McHenry changed his mind. "No; make it a big question mark of cupids and the caption 'Which of These Women Does This Man Love?' Yes, and frame in his wife too. Three columns."

"Yes, sir," responded the artist, starting away with the photos.

But McHenry called him back.

"Hey!" he cried. "Make that 'Which of These Beautiful Women Does This Man Love?'"

The artist bowed in acquiescence and escaped.

McHenry took up another photograph.

"Ha, what a beauty!" he said enthusiastically. "What's she been doing?"

"She is Judith Bartelmy, the judge's daughter. She gave a reception to-day," answered Downs, the city editor.

"High society all there as usual, I suppose?" mused McHenry. "The Bartelmys are an old family, and they've held on to some of their money. Here, Downs," he went on, "play her up for two—no, three columns. Maybe it will square it with the judge for what we did to him in the paper this morning. You explain to an artist."

"All right."

"The new boss, Nolan, is coming down to look us over tonight," added McHenry.

"Wonder where we'll all be working next week?" was the city editor's reply over his shoulder as he quickly made his exit.

The boy came in and laid a card on the managing editor's desk.

"Miss Judith Bartelmy!" exclaimed McHenry as he glanced at it. "Well, what do you think of that, Moore?"

"It's a kick sure, and—"

"By the way," interjected McHenry deliberately, "this girl, Judith Bartelmy, isn't she engaged to Wheeler Brand?"

"Seems to me I've heard something of the sort," assented Moore vaguely.

"Well, same here, and Brand wrote that story this morning showing up her father, the judge, as a trickster of the worst, most dangerous sort. Now the girl comes to this office—probably to defend her dad. Say, Moore—the managing editor was becoming excited—"things are getting warm around here. Brand certainly had his nerve with him to hand such a roast to his prospective father-in-law."

McHenry turned abruptly to one side and reached for his coat, which he quickly donned.

"Show her in," he called to the boy.

Moore hastily retreated from the room as Judith Bartelmy entered, leaving the judge's daughter alone with the managing editor. McHenry had long flattered himself that he had met many attractive women in his

when they're young, but he never met one like that. "And that's something they're over, isn't it?" she asked eagerly. "Yes," responded McHenry, as though to leave the room.

Judith stepped squarely in front of his desk.

"But I don't want to disturb you. Can't I go to his office?"

"He hasn't got any office, and I all bunched in the local room in shirt sleeves smoking. You would like it. We haven't a receptionist," McHenry laughed as he spoke.

In his shirt sleeves, rolled to his elbows, with quick steps and a shoulder, Wheeler Brand, one of the ablest men on the city staff of the Advance, strode into the office managing editor through the door coming from the city and telegraph room.

"Yes, sir," he greeted McHenry. Then he stopped short both steps and in his speech. He caught sight of the managing editor's visitor. "Why, Judith!" he gasped. "What in heaven's name are you here? I"— At this point words failed him, and he stood staring at her, his breast heaving violently as a result of his surprise.

The girl was also deeply disturbed in spite of her previous knowledge she was to be confronted by the man she loved.

McHenry thought that the man had arrived when his presence no longer necessary.

"Miss Bartelmy has asked to see me for a few minutes," he said, rising and starting toward a door. "You talk here." A handful of proof sheets rustled in his grasp as he disappeared.

Wheeler Brand started toward the girl.

"Is there anything the matter with you?" he asked anxiously.

She hesitated before answering. Then she spoke determinedly.

"Yes; two things. First, you came to my reception this afternoon, secondly, there is that article about my father this morning."

"I couldn't get off from the office to attend the reception, and I am awfully sorry," he protested. "But the story about your father—what does he send you here?"

"No, he didn't send me. I couldn't help seeing how disturbed he was, and—"

"Then he knew you were coming?"

"Why, yes," Judith was trying to understand what he meant by trying out her father's knowledge of her present mission, one which was decidedly unpleasant.

Wheeler was plainly impressed unfavorably so, at the girl's reply. "Oh!" he ejaculated disappointedly.

The quickly thinking girl detected the significant tone of the newspaper writer's reply and hastened to plain.

"I heard my father say at that he feared there would be an attack tomorrow," she said, "I hoped through you to prevent it and to make the Advance apologize for what it said this morning. I don't see how your paper could publish such things."

"But, Judith," he answered, "couldn't you dodge a story as big as that? We had to print it. That's what here for."

But she was still insistent.

"Oh, of course, print the story. I mean the insinuation all the time. Why, by using such unfair insinuations can bring discredit on one. Mr. McHenry refused to give. He wouldn't even tell me

as he rose to meet Judith and surveyed this fashionably young woman he noted that she surpassed her blond features were of patrician cast. Her blue the magnetic qualities so on the many less fortunate women the pure whiteness of her rived chin and neck was admirably revealed by the low cut her princess gown of wine silk which clung to a figure that artists had pronounced in its symmetry. He began to complain about the attacking my father this morning girl began.

answered McHenry. "I am an apology for it." "I received a message from your father."

"Not the point. This is the point in his life that any one has to question his honor. The false, and I think your father should apologize for it immediately."

"Saying as to that," returned the managing editor, "I should have the matter to the new problem. Mr. Nolan. You know it is necessary for a newspaper to state what it says."

"My daughter raised her eyes in surprise as she drew close to his desk, where he had resumed his work. "I don't think you'd have a good result," she suggested.

"Not many. We go up to the top and we try not to step over it." "I read several newspapers from London." "For instance"—scanning the paper—"I don't think your father inclined to sue us." He rose and the interview.

"However, was not to be thus of. "I want to detain you," she replied. "but I should like to ask you responsible for that article."

"I ed herself in a chair which indicated. "I never tell the name of our writer," answered the managing editor. "He had diplomatically suggested that Wheeler Brand might mention the story. This she found to believe. But she must be sure, and one of her motives in the newspaper had been to ask him to tell her that he was the author of the new attack on her. She must see him and get the truth from his lips alone."

"Brand in the office now?" she asked.

"I think so."

"Is it possible for me to see him?"

"Yes, if you wish. I'll send for him."

"My father summoned the boy and told him to 'ask Mr. Brand to come in.'"

"Noticed"—she hesitated—"all the girls have noticed that he's been very radical lately." Judith sat in the chair and stepped nervously toward the editor's desk. "He laughed, 'they all get that you're young, like the measles.' 'That's something they all get it?' she asked eagerly."

"I responded McHenry, stirring her to leave the room. "I stepped squarely in front of him."

"I don't want to disturb you. Go to his office?"

wrote it. Do you know?"

Brand gave a violent start. At first, in her present mood, he hardly dared answer the girl. With a determined effort he pulled himself together and answered her question.

"Yes, I know who wrote it."

"Who?" Judith leaned toward him, gazing intently into his eyes.

"I wrote it," he announced.

Judith started back aghast.

"You, Wheeler? Why?" she cried hysterically.

"I had no choice." He struggled to maintain his grip on himself.

"You had no choice?"

"Judith, when this Lansing Iron case first broke loose," Brand responded firmly. "I saw straight off that it was one of the slickest—well, that there was a big story in it. I didn't know your father was involved in this at first. I just followed the path, and when I saw where it was leading me I wanted to turn back because of you, but I couldn't." He stopped for a moment, then went on: "No, no. I could not stop—not even—for you!"

"But it isn't loyal of you," was her response. "It wasn't like you—to at-

tack him—suddenly in this way. It's almost as if you struck him from behind. And do you not see, Wheeler, that you are hurting me as much as you injure him? I am his daughter, Wheeler, and if you ruin my father you will ruin me."

She covered her face with her hands, and her bosom heaved convulsively in her anguish.

"You, Wheeler? Why?" she cried hysterically.

"I had no choice." He struggled to maintain his grip on himself.

"You had no choice?"

"Judith, when this Lansing Iron case first broke loose," Brand responded firmly.

"I saw straight off that it was one of the slickest—well, that there was a big story in it.

I didn't know your father was involved in this at first. I just followed the path, and when I saw where it was leading me I wanted to turn back because of you, but I couldn't."

He stopped for a moment, then went on: "No, no. I could not stop—not even—for you!"

"But it isn't loyal of you," was her response.

"It wasn't like you—to at-

tack him—suddenly in this way. It's almost as if you struck him from behind.

And do you not see, Wheeler, that you are hurting me as much as you injure him?

I am his daughter, Wheeler, and if you ruin my father you will ruin me."

She covered her face with her hands, and her bosom heaved convulsively in her anguish.

(To be Continued)

What Every Mother Should Know.

Every mother should early learn the appearance of a healthy throat.

She can then easily recognize inflammation, enlarged tonsils and other unhealthy conditions.

She should also know how to treat them.

Wheeler Brand gave a violent start.

At first, in her present mood, he hardly dared answer the girl.

With a determined effort he pulled himself together and answered her question.

"Yes, I know who wrote it."

"Who?" Judith leaned toward him, gazing intently into his eyes.

"I wrote it," he announced.

Judith started back aghast.

"You, Wheeler? Why?" she cried hysterically.

"I had no choice." He struggled to maintain his grip on himself.

SMITHERS' TOWN.

Chairman of G. T. Board is Immortalized at Last.

Right in the heart of the great fruit orchard of British Columbia—that picturesque spot known as the Bulkley Valley—surveyors and engineers and all such are busy on a new town.

That town has a reason. So has its name.

The first is the fact that it is the only general freight and passenger division point between Prince Rupert and Fort George.

The second is—Smithers.

And a very good reason the town has for calling itself by the name of its godfather. Not only because Mr. Alfred Waldron Smithers is chairman of the Board of Directors of the Grand Trunk, although that alone would seem sufficient reason. Not only because, as the highest officer of the Grand Trunk Pacific, he is called the counsellor of the Grand Trunk official family. A most estimable characteristic to be sure.

Still, that is not the only reason why the first general freight and passenger division point east of the western terminus of the new railway should be called after the good counsellor of the official family.

He was asked to be the godfather of many Western towns which we saw not long ago out in the heart of the Rockies—towns which looked calmly on huge glaciers and rushing torrents, on mighty cascades and forests of cedar; towns which are springing gradually from canvas and tent prosperity into the more substantial forms in lumber and brick.

And now comes the reason why the last town—and most decidedly not the least—came to be named after the great man who is quick to recognize good work, and just as quick to clothe criticism in silence.

"Serve the others first" was his motto.

And that is how they have Edson and Watrous and Biggar and Wainwright, not to forget Melville, named after the great man, Charles Melville Hays, in whose brain the whole Western scheme originated. It was all so characteristic of Alfred Waldron Smithers to wish to be the last godfather on the Western line.

Perhaps that is why they made his town such an important one. For, apart from being in the very centre of things agricultural, Smithers, the town, wears a perpetual belt of silver, copper, and lead.

Which seems rather extravagant for a newly-christened infant of the West—or anywhere.

But we must speak of Smithers, the man. His modesty has been hinted at above. Forty years ago, when he was a youth of 25, he joined the London Stock Exchange, and remained a member until four years ago, when he resigned, to devote his energies to the development of railroads in Canada. Being the son of the late William Henry Smith, of the Bank of England, it

redge more than came up to expectations.

"We have had night and day gangs or workers engaged on the construction of the dredge twenty-four hours a day and without a let up in order to bring it to completion within the one hundred days," said Manager A. J. Jefferies.

The inspection was made with Wm. Newman, works manager of the Polson Iron Works, who furnished the designs from which the vessel was built, acting as the guide.

Completely equipped, the dredge will weigh 1,200 tons, and is a double-decked structure. It is 180 by 43 feet, with a moulded depth of 11 feet, and a draught of 6½ feet, is steel throughout and fitted with five bulkheads, dividing it into six watertight compartments.

A 24-inch suction pipe is located in the forward end of the hold, directly connected with a 14 by 22 by 36 by 21-inch triple expansion engine, obtaining steam from two 13 by 12 feet Scotch boilers, also located in the hold to the engines.

The operation of the dredge is out of the ordinary, because it is not of the stern pivot type. Two steam capstans will be located at the stern, and one at the bow, and by means of anchors located some distance each side of the vessel, at both front and stern, the dredge will be moved from side to side bodily, the dredge end of the discharge pipe moving with it. The cutter and suction arm at the front will be raised and lowered by a winch engine in the centre of the vessel. All the control of the suction, cutters and winch machinery will be from a central point at the rear in an operating room, on the upper deck.

An important feature of the dredge is a complete machine shop, equipped with lathes, planer, drills, etc., in a room in the hold of the stern. In addition, there is a compressed air unit, with a supply of air tools, and a small brass furnace for the production of small brass castings. This will make the dredge self-contained in the event of breakdown far away from supplies.

Both sides of the main deck at the front of the engine room are divided off into cabins for the officers and crew, and the central part of the main deck at the front forms a saloon. A crew of 35 will be carried.

The dredge, while operating for the most part in fresh water, has been given salt water equipment throughout. This includes copper piping and a fresh water tank of 80 tons capacity. The coal capacity is 250 tons.

The dredge is making the trip from Toronto to Hudson Bay by way of the St. Lawrence River, being of a suitable size to pass through the locks, and around the Labrador coast. It will be towed all the way. Temporary rudders on each side of the stern will be added for the trip. The dredge is provided with 600 feet of 1½ inch stud link chain, with a three-ton anchor. There is also a sea anchor in case it is neces-

What Every Mother Should Know.

Every mother should early learn the appearance of a healthy throat. She can then easily recognize inflammation, enlarged tonsils and other unhealthy conditions. She should also accustom her child to throat examination. Even a baby will soon learn that there is nothing to dread in having a teaspoon or other form of tongue depressor used. As so many of children's serious troubles start in the throat, it is better to be overcautious and to summon a doctor at once. The appearance of a rash is another danger signal which should not be allowed to go unheeded. A child on whom a rash has broken out should at once be quarantined, especially if there are other children in the family.

If a child shows any bad effects from a fall a doctor should be consulted and the child thoroughly examined. The fact that no bones are broken is no proof that other injury has not been sustained. This is one of the cases where an ounce of prevention is worth many pounds of cure.

Plate Baby Can't Push Off the Table.

At last some one has brought out a plate that baby can't push off the table and break into a dozen pieces. This new plate resembles a flat, deep bowl and is attractively decorated with nursery rhymes and Kate Greenaway pictures. Around the lower bottom is fastened a strong wire support that catches under the table edge, the edge of a high chair or tray and that keeps the plate firm.

Electric Restorer for Men

Or at Hooper's Drug Store.

But we must speak of Smithers, the man. His modesty has been hinted at above. Forty years ago, when he was a youth of 23, he joined the London Stock Exchange, and remained a member until four years ago, when he resigned, to devote his energies to the development of railroads in Canada. Being the son of the late William Henry Smithers, of the Bank of England, it seems natural that he should be recognized as a financial authority throughout the British Empire.

In 1895 he became a director of the Grand Trunk, later being elected vice-president and chairman.

England still claims much of his attention, he being a director of the South Eastern and Chatham Railway, and chairman of the English Association of American Share and Bondholders.

And apart from all this, from his interest in things of national import, it is possibly the most interesting in his private life. Children are his weakness, and wherever he is, he is seen surrounded by laughing tots, all delighted to be entertained by the "big man of finance."

HUGE DREDGE FINISHED.

Craft for Deepening Port Nelson Harbor a Wonderful Boat.

An important step towards the fulfilment of the Dominion Government's great plans for the creation of a deep water harbor at Port Nelson, on big Hudson Bay, was the departure from Toronto recently of the biggest and strongest steel hydraulic dredge of its kind ever built in Canada, the Port Nelson.

The new vessel, the contract price of which was \$270,000, was built at the yards of the Polson Iron Works here, and the whole undertaking from start to finish was accomplished in exactly a hundred days. This probably establishes a Canadian record for the building of a vessel of such size.

While the finishing touches were being made to the boat a party of about fifty shipping men and marine engineers inspected the vessel at the invitation of the Polson Company. These men afterwards stated that the new steel

St. Lawrence River, being of a suitable size to pass through the locks, and around the Labrador coast. It will be towed all the way. Temporary rudders on each side of the stern will be added for the trip. The dredge is provided with 600 feet of 1½ inch stud link chain, with a three-ton anchor. There is also a sea anchor in case it is necessary for the tug to cast the dredge adrift at sea.

Wagner's Music.

By the study of Wagner's masterpieces a glimpse of the eternal is had, and once the vision of his truth fills the soul counterfeits are detected instinctively. The polyphony of Bach and the music of "Die Meistersinger" prove the spiritual kinship of Wagner with the founder of modern music. A Beethoven symphony and the "Tristan und Isolde" music demonstrate the common genealogy of the composer from Bonn and the maker of music dramas, but listen to the Strauss music from "Salome" when the prophet is being murdered in the well and then hear the mighty tone structure of the last scene from "Gotterdammerung" and observe that Strauss shrieks while Wagner chants.—San Francisco Call.

The Coach and Four Came.

Among the many records of Harrow school is that of a boy, the son of a poor local tradesman in a very small way of business. His schoolfellows often taunted him about his family poverty. Their thoughtless jeers, although hurting his feelings, drew from the lad the retort, "I intend before I die to ride in a coach and four." The years sped by, and, lo and behold, the poverty stricken youngster of Harrow had developed into Dr. Parr, the greatest scholar of his time, whose customary and favorite means of locomotion was a coach and four!—London Mail.

Making the Little Farm Pay

By C. C. BOWSFIELD

A SILO is needed on the small dairy farm more than anywhere else. It does away with the need of a large pasture and insures a full milk supply during summer droughts.

Fodder preserved in a concrete silo is safe from fire and waste and retains the maximum food value. The cost of building a silo with a capacity of 150 tons need not exceed \$300. It varies according to the supply of labor. Concrete costs little more than wood and is so much better in every way that it is confidently recommended. No fodder is relished so much by stock as silage. Its influence is beneficial to the animal system, is invigorating and prevents cripples and impaction. Succulent silage makes for good health and heavy milk flow. It is equally good for poultry and hogs.

Corn is the most suitable of all crops for silage. It should be harvested when the bottom leaves are drying off and the grain is doughy and glazing. Without hurrying the work of filling the silo, the best method is to ensile the crop as soon as it is harvested, cutting the stalks and cobs into small bits. The grain is more or less macerated in the cutter.

The fodder thus treated is carried by means of an elevator or blower, which should deliver the material as near the center of the silo as possible. This may be done by the aid of a bag chute attached to the mouth of the elevator or the blower.

The labor of distributing the fodder is thus minimized, and an even supply of the material will be distributed all over the silo. If the fodder be allowed to fall direct from the mouth of the conveyor the heaviest parts will fall on one side and the lighter parts on the other. The silage will not settle evenly, and loss will eventually. To assist in close packing it is absolutely essential to trample the product all over the silo. Trampling the sides or around the edges is not sufficient, for with the shrinking of the center the outer edges creep toward it and away from the walls, thus allowing access of air and consequent loss. The center should always be kept a little higher than the outer edges. The rate of filling should be six to eight feet per day. Quicker filling than this may result in generating too much heat, in which case the silage is liable to decompose.

After the silo has been filled the fodder should be covered with a light framework or coarse sheet and weighted down. This is done to keep out air, and after the silo has been opened for use in the spring or summer it is best to replace this top covering after each day's supply is taken out. Avoid, as far as practicable, sinking holes in the silage. In fact, keep as little of

Farm and Garden

BLACK ROT OF CABBAGE.

Recognized by Blackened Veins of Leaves—Treatment Recommended.

Black bacterial rot of cabbage, says a bulletin of the Connecticut agricultural experiment station, occurs on a number of related cruciferous plants, but we have reported it from this before only on cauliflower. While we did not see it on cabbage until last season, it seems quite probable that it has caused more or less harm to this host before, since it has been reported as quite injurious in several other eastern states in times past.

This disease is recognized by the blackened veins of the leaves, where the bacteria develop chiefly, and in time extend down into the head. The leaf tissues finally turn yellow, and the leaves are easily pulled off. Soft rot, caused in part by other organ-

Photo by Connecticut experiment station.

BLACK BACTERIAL ROT OF CABBAGE.

isms, often loosens them at the base and develops an ill smelling internal decay. The bacteria gain entrance through drops of water at the water pores on the margins of the leaves.

As the germs of this disease can be carried on the seed, it is wise to see that the seed used does not come from a diseased crop. If doubt exists it is well to treat the seed with formalin, 1-240, or corrosive sublimate, 1-1000, for fifteen minutes. Likewise, if the disease shows up in a seed bed, this should be changed the next year. If bad in the field this land should not be used for cruciferous crops for several seasons and, even if the disease is not present, yearly rotation is desirable where it can be carried on without especial difficulty. Refuse from diseased cabbages should never find its way to the manure pile.

DON'T LET CROPS "FIGHT."

Professor Taylor of the agricultural economics department of the University of Wisconsin agricultural experiment station says no single farm crop grown in Wisconsin keeps the farm labor busy all the time, but by a

returning organic matter to these soils.

"If live stock is fed on the farm and the straw and other refuse are worked into the manure it will decay faster when returned to the land. While a rotation can be used with profit if live stock is not kept, it is much easier to return the organic matter contained in the crop residues when they are fed on the farm.

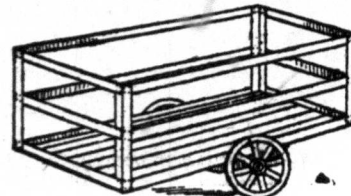

"Live stock is not absolutely necessary when beginning a rotation, but for the average conditions when they are kept the profits will be greater. A rotation may be followed without the return of the organic matter for a time, but eventually it must be returned. If not returned in manure more expensive methods must be used."

PUT THE HOG IN THIS.

Homemade Contrivance Good Also For Moving Other Heavy Objects.

Here is the handiest hog chute we ever have seen, and it can be arranged out of an ordinary chute by taking a couple of cultivator or any other small wheels and putting them a little over midway of the floor from the rear end, says the Iowa Homestead.

While any piece of strong timber will make a suitable axle for bearing up the chute, an axle from some old discarded spring wagon or buggy will

PORTABLE HOG CHUTE.

[From the Iowa Homestead.]

last practically a lifetime and prove much more satisfactory than a wood axle. When it is desired to move the chute all that is necessary is to tilt the rear end and push the frame to the desired position, instead of the old, cumbersome method of tugging and dragging it around to where it was wanted.

If the wheels are kept well greased or oiled and if the chute is not too heavy one can use it for moving heavy articles around that could not be carried by hand.

The Value of Limestone.

"As valuable as lime is on the farm when the correction of acid soils is necessary it is not necessary to pay exorbitant prices for it," said Porter Elliot of the College of Agriculture, Ohio State university. "At recent extension schools during the discussion of soil liming it developed that farmers were paying as high as \$9 a ton for carbonate of lime when ground limestone, which would do the work just as well, could be secured for less than a third of that cost. Get good ground limestone, and it will correct acidity just as readily as the best carbonate of lime you can find on the market. The farm profits will not increase until such useless waste is eliminated from the farm practices."

"GARDEN TRUCK."

The ground dries out more quickly under a high headed tree and more fruit is blown off by the wind.

FOR A SILO SCAFFOLD

Directions For Making Necessary of Concrete or Tile Structure.

Should any one be thinking of building a concrete or tile silo the scaffolding might help in building the scaffold. After the foundation wall is laid get five poles a little eight feet higher than you expect the silo to be. Set inside of the wall enough to hold poles in place.

Heavy lines, 2 by 4's; dotted lines to work on; five small circles position of support poles.

SCAFFOLD INSIDE SILO.

[From National Stockman and F.

the silo as high as you can find ground; then take 2 by 4's or 2 by 6's and build frame for scaffold as in cut.

Leave plenty of room for work easily; then floor as shown dotted lines in cut. Attach a pole and raise when ready spike a piece under scaffold. One scaffold does it all. The

fodder should be covered with a light framework or coarse sheet and weighted down. This is done to keep out air, and after the silo has been opened for use in the spring or summer it is best to replace this top covering after each day's supply is taken out. Avoid, as far as practicable, sinking holes in the silage. In fact, keep as little of the silage exposed to the air as possible.

The daily ration of silage for a dairy cow is from thirty to forty pounds when fed with other fodders; when there is some grass available thirty pounds per day is ample. Sheep will eat as much as three pounds a day. It is advisable to give horses small quantities only of silage; otherwise there may be trouble from stomach derangements. Limit the amount fed to a few pounds per day. Pigs and poultry will eat small quantities.

Silage may be made of all plants that animals are permitted to eat in the green state, and such fodder preserved by this means loses but little of its feeding properties in the process. In one way there is a slight improvement. That is, the tougher fiber of siloed fodder is softened and made thereby more digestible and acceptable to animals.

However, there is great risk in putting vegetables in a silo if a dairy is kept. The milk is apt to be tainted. Oats, rye, millet and alfalfa work well in connection with corn, but the latter is the main staple and may be used by itself.

Professor Taylor of the agricultural economics department of the University of Wisconsin agricultural experiment station says no single farm crop grown in Wisconsin keeps the farm labor busy all the time, but by a proper combination of crops employment of labor can be extended materially throughout the year. There are, however, limits to diversification. For instance, corn and tobacco require labor at the same time for planting and cultivation and are therefore competing crops, but tobacco furnishes winter employment to labor when there is a scarcity of employment, and therefore to this extent these crops are noncompeting or complementary. The use of noncompeting crops may well extend the operations of the farm.

ROTATION AND STOCK.

Two Work Together to Bring Greater Profit to the Farmer.

In a bulletin of the North Dakota station R. C. Donegheue says of live stock in the general plan of crop rotation:

"In regions of light rainfall the maintenance of the organic matter of soils is the most practical method of increasing their water holding capacity. The plant remains. Straw, stubble, etc., in these sections decay very slowly, and much care is necessary in

such useless waste is eliminated from the farm practices."

"GARDEN TRUCK."

The ground dries out more quickly under a high headed tree and more fruit is blown off by the wind.

Manure the rhubarb and asparagus fields. Both crops are the best where there is an abundance of vegetable matter in the soil.

Asparagus roots, properly planted, fertilized and given good culture, will continue to produce large spears for fifteen to twenty years in succession.

If the currant or gooseberry bushes become infested with worms the pest can be abated by dusting the bushes with powdered white hellebore or spraying them with a solution made by adding the hellebore at the rate of a tablespoonful to a quart of water.

Lime dust around garden plants will keep away snails. They may also be trapped by putting cabbage leaves, lettuce or bits of raw potato about the infested places, leaving over night and then removing and destroying the snails harbored by the trap material.

WHY BURN UP WEALTH?

According to some authorities, the value of plant food removed from the soil per bushel of wheat is about 30 cents for average yields. The plant food elements, contained in straw are sometimes returned to the soil whence they came, either in the form of straw or mixed with farm manure where it has been utilized for bedding purposes. It is not plain why the farmer should spend so much time and energy striving to raise large yields of grain and straw and then waste about one-half of the net profit of the crop. There should be some means of utilizing that portion of the wheat crop which heretofore has been burned on a large percentage of our farms. —Kansas Farmer.

Good Plant Protector.

To be made from bottomless barrel, especially for early squash or the main crop in the far north.

Two covers are made from one barrel, which is sawed in two, with a slant through the bilge of the barrel extending to upper and lower hoops. Tie a string about the barrel and mark with a pencil for a guide to saw by.

Cover each half with a piece of muslin, which is held in place by the top hoop if easily removed, otherwise by tying a string about the barrel.

Its usefulness may be prolonged by putting on a hay wire for a bottomless hoop.

Fasten near the bottom with double pointed carpet tacks or small wire nails.

Any sized cask may be used suited to the plant, from a paint keg to a puncheon.—American Cultivator.

Dr. de Van's Female Pills

ground, then take 2 by 4's or 2 by 6's and build frame for scaffold as in cut.

Leave plenty of room for p work easily; then floor as sho dotted lines in cut. Attach a pi each pole and raise when ready. spike a piece under scaffold o One scaffold does it all. Th fold should have just play eno let it slide up easily. Sometim is too loose a wedge to hold while at work should be put in.

The idea of having the poles than the silo is high is to get high enough for last raise.—N Stockman and Farmer.

Chicks Need Cleanliness.

Drinking dishes and feeding t for chicks are likely to become and insanitary unless special t tions are taken, according to Pr J. G. Halpin of the College of A ture of the University of Wis Drinking water should never be in common dishes or vessels wh chicks may get in with both fe "sanitary" fountains, either bou or purchased, should be used. should be cleaned and scalded quent intervals. Wet mash fed in wooden troughs mold un refuse feed is scraped off an troughs are placed on end so th may dry in the sun. Neglect o two simple matters may cause erable loss.

Coverings For Silage.

The use of heavy tarpaulin to the surface of silage during si feeding is being practiced quit cessfully by some of the readers Kansas Farmer. The tarpaulin i carefully spread over the whol face of the silage, and the silage moved from half the surface o each feeding, alternating from o of the silo to the other. In this thicker layer can be removed fr surface fed from daily. The tar cover retards the tendency to s the surface left untouched.

EIGHT HOUR DAY ON FAR

A writer in Farm and Fires says that the eight hour c with farmers consists of el hours for work and eight ho for chores.

o as high as you can from the 1; then take 2 by 4's or 2 by 6's and build frame for scaffold as shown

e plenty of room for poles to easily; then floor as shown by lines in cut. Attach a pulley to pole and raise when ready. Then a piece under scaffold on pole. scaffold does it all. The scaffold should have a rope attached to it

Milady's Mirror

Care of Hands in Summer.

The hands in summer, if they are to be kept soft, white and smooth, require almost as much care and attention as during the colder months, for the sun and hot air have a most drying effect on the skin, making it hard looking and wrinkled. Few women realize that it is almost as easy to tell the age by the hands as the face, although some hands have been so neglected by their owners that they look old long before they should, and the same may be said of some faces.

Never judge a woman's age either by her hands or her face, for both are so largely influenced by the treatment they have received in the past that it is never quite fair to do so. Hands do not age and wrinkle in a day or a week. The process is so gradual that it is not noticed till the owner of a pair of aged hands suddenly awakens to the fact that, whatever may be said to the contrary by kind and indulgent friends, her hands stamp her as past forty, although her face may not look thirty.

To keep your hands in really good condition during the summer you must feed them by giving them a liberal supply of oil or cream every night.

For this you may use cocoa butter, pure almond oil, mixed with a little fine ointment, or a paste made from the yolks of two eggs, a tablespoonful of pure almond oil, one of honey and a teaspoonful of simple tincture of benzoin. Mix all these together, beating the yolks of the eggs first, then stirring the honey, then the oil and lastly the benzoin. Beat to a cream, smear over the hands, then slip on a pair of old chamois leather gloves with holes cut in the palms and wear them all night.

Once a week is sufficient for this treatment when the hands are in fairly good condition, but when they have been much neglected it should be given every night for two or three weeks till they are soft and smooth; then the weekly treatment will be ample to keep them nice and youthful looking.

Hands which turn red and appear swollen in hot weather should be washed in warm water (never cold), and a few drops of liquid ammonia should be added to the water. After washing they should be dusted with starch, and all gloves should be quite loose fitting.

Many women suffer with moist, clammy hands during summer, and nothing is more uncomfortable or more disastrous to gloves, which become stained and spoiled with one wearing. To remedy this, sponge the hands after washing in warm water with a lotion made by mixing one part eau de cologne with two parts rosewater and dust with boric acid powder mixed with half its quantity of starch. Brush the powder off and the hands will feel dry and fresh.

When choosing gloves for summer wear choose a size which will be too large rather than too small. Squeezing the hands in tight gloves makes them

For the Children

Little Son of Captain Scott, the Lost Explorer.

MASTER PETER SCOTT.

Very likely you all remember father or mother a little while ago telling you about Captain Scott and the brave men who went with him to find the south pole.

It does not much matter to you what this south pole really is, except that every one agrees that to find it is about one of the hardest things on earth to do.

Captain Scott and his party did find the pole after months of suffering and danger, but they found it only to lose their lives out in this frozen region.

It was a splendid, fine thing to do what these Englishmen did, even if they found out after reaching the pole that another man, Amundsen, had got there ahead of them. The world nevertheless always will be proud of this little company of Englishmen who failed to arrive first at the pole.

The sweet little boy whose picture you see is Peter, Captain Scott's baby

STRONGLY ADVISES "FRUIT-A-TIVES"

Because They Cured Him, And They Will Cure You

MR. ALEX. MCCARTER

WALKERTON ONT., May 9th, 1911.

"I have been in Walkerton in business for a good many years and many of my townsmen know that my health, for long periods was precarious. My trouble was extreme Nervousness, brought on by Indigestion and Dyspepsia, from which I suffered in the most severe form. It was so bad that I could not sleep before about four in the morning. I noticed one of your published testimonials of how someone had used 'Fruit-a-tives' for similar trouble and asked Mr. Hunter, my druggist, his opinion on the matter and he advised their use. I immediately procured several boxes and I am pleased to say that I now enjoy splendid health and could not possibly feel better. I can eat with every degree of satisfaction and sleep without an effort. I strongly advise anyone suffering from like complaints, to commence using 'Fruit-a-tives'. ALEX. MCCARTER.

50c. a box, 6 for \$2.50—trial size, 25c. At dealers or from Fruit-a-tives Limited, Ottawa.

Points for Mothers

Child's Summer Diet Should Be Simple.

In regard to summer meals simplicity should govern their preparation. Avoid all highly seasoned dishes. Prepare light meals with cooked or uncooked cereals, plenty of vegetables prepared simply, fruits not too ripe or green, with very little meat indeed, says Dr. Maude Kent in Modern Priscilla Magazine. A bit of carefully boiled or baked beef, mutton or fowl once a day is a large meat allowance for a child who is old enough for such foods. The fresh, green vegetables are most wholesome.

Cut down on potatoes in hot weather and always serve them baked or mashed without rich gravy. Soups or broths (all fat removed), with rice and finely cut or chopped vegetables, are espe-

then take 2 by 4's or 2 by 6's build frame for scaffold as shown t.

ive plenty of room for poles to easily; then floor as shown by d lines in cut. Attach a pulley to pole and raise when ready. Then a piece under scaffold on pole, scaffold does it all. The scaffold should have just play enough to slide up easily. Sometimes if it o loose a wedge to hold it firm at work should be put in.

idea of having the poles longer the silo is high is to get pulleys enough for last raise.—National man and Farmer.

Chicks Need Cleanliness.

inking dishes and feeding troughs hicks are likely to become dirty insanitary unless special precautions are taken, according to Professor Halpin of the College of Agriculture of the University of Wisconsin.

ding water should never be placed in dishes or vessels where the s may get in with both feet, but tary" fountains, either homemade or purchased, should be used. These d be cleaned and scalded at fre intervals. Wet mashers when a wooden troughs mold unless all e feed is scraped off and the hbs are placed on end so that they dry in the sun. Neglect of these simple matters may cause consid e loss.

Coverings For Silage.

use of heavy tarpaulin to cover surface of silage during summer ing is being practiced quite suc ally by some of the readers of the as Farmer. The tarpaulin is very uly spread over the whole sur e silage, and the silage is rel d from half the surface only at feeding, alternating from one side e silo to the other. In this way a e layer can be removed from the e fed from daily. The tarpaulin retards the tendency to spoil on urface left untouched.

WHT HOUR DAY ON FARMS.

A writer in Farm and Fireside ys that the eight hour day th farmers consists of eight urs for work and eight hours chores.

ROWN IN LEGAL SOIL.

eanf mute is not incapable of en into contracts if shown to have ent mental capacity.—Alex veratzke, Mich. 115 N. W. Rep. 251.

erally every partner is under obn to exercise due diligence and ible skill and devote his serv e the promotion of the common t of the firm without compensa y way of wages or salary unless vise agreed upon.

United States patent law re a person applying for a patent e oath that he does verily be himself to be the original and ventor or discoverer of the art, ne, manufacture, composition or vement for which he solicits a ; and that he does not know and not believe that the same was efore known or used.

made by mixing one part eau de cologne with two parts rosewater and dust with boric acid powder mixed with half its quantity of starch. Brush the powder off and the hands will feel dry and fresh.

When choosing gloves for summer wear choose a size which will be too large rather than too small. Squeezing the hands in tight gloves makes them look larger rather than smaller and causes them to become swollen and red, as it impedes the proper circulation. Before putting on the gloves dust a little boric powder into the fingers and palms, as this not only makes them slip on more easily, but keeps the hands dry and cool.

To Reduce Double Chin.

The greatest of all inventors has become a beauty specialist.

After revolutionizing industry, threading nations together with his quadruplex telegraph wire and his electric railway lines, after increasing the value of the country's products until \$7,000,000,000 is invested in industries founded or touched by his inventions, Thomas A. Edison has removed a double chin.

Joking? Not at all. Ask Mrs. Edison.

If you have ever met the white haired master of things electric you know his willingness to laugh. It's usually at himself. You will not be surprised, then, to learn that Edison smilingly announced he would brighten eyes, peachify cheeks, fill out neck hollows and abolish surplus chins, all by his new and infallible process—cutting down sleep and food!

"I have proved to my wife, at least," he said, with a twinkle, "that women who would keep young and slender must never sleep but six hours. Less would be better, but six will do.

"Funny, isn't it, how you can talk yourself black in the face trying to demonstrate science to a woman? She won't listen. Talk beauty to her and her attention sticks like glue. Funny, isn't it? Anyhow, I've proved my point, banished the chin and taught her to sleep six hours instead of nine."

Mrs. Edison is so far the only family disciple of the new beauty theory. Miss Madeline, recently betrothed to a young inventor, is not bothering much about extra chins, says her father. Neither are the boys, Theodore and Charles. "But wait," says Papa Edison. "They'll all come round to my way of thinking some day."

What Makes a Good Cow?

Professor W. J. Kennedy of the Iowa station recommends the following in reference to the selection of breeding stock for the dairy:

In selecting dairy cattle the real test must be the scales and the Babcock tester. The cow is a machine to convert food into milk. Thus she must have a large middle and a strong constitution to insure the best results. She must also have a large udder, large milk wells, large crooked milk veins and good sized teats.

What Makes the Good Bacon.

Of course you like the big, juicy, red and white streaked strips of bacon. But you may not know that this kind of bacon is produced by feeding ground barley mixed with skim milk. Soaked barley alone is an excellent hog feed. Barley also is good for sheep and as a feed for horses and cattle is nearly equal to corn.

they found out after reaching the pole that another man, Amundsen, had got there ahead of them. The world nevertheless always will be proud of this little company of Englishmen who failed to arrive first at the pole.

The sweet little boy whose picture you see is Peter, Captain Scott's baby son, who waved goodbye to his father when he started for the pole two years ago. Peter missed his father so much that every now and then he would say to his mother: "Isn't it time daddy came home again? He promised he'd come back to us soon."

If you care to know more about Captain Scott and this little boy there is a book written especially for you children which tells the whole story of the expedition.

Conundrums.

Why do Russian soldiers have steel and the French brass buttons on their coats? To fasten them with.

How can you swallow a door? Bolt it. Why is a watch a difficult thing to steal? Because it must be taken off its guard.

Why is an air played by an orchestra like Italian robbers? Because it is a band ditty.

An Industrious Child.

Anne Elizabeth Emily Green
Loved to polish and scrub and clean.
Early and late and brisk as a bee,
Good little girl, she'd work for three.

She polished the knocker right off the door.

She scrubbed herself through the pantry floor.

She brushed the dog till she made him jump.

And washed the cat at the back yard pump.

She rubbed the color quite off the face Of her waxen dolly, whose name was Grace.

And combed her hair in so stern a way It all came off in a heap one day.

Out in the garden among the flowers Anne Elizabeth raked for hours.

Cried when some of them would not grow, "Well, it's a great deal neater so!"

The fairies watched, and they said, "It's clear Talent like this is wasted here."

So they whisked her up in the air one night And set her to polish the old moon bright

And there she toils, for Anne has found The moon is terribly large and round.

While the man is cross if she isn't quick In trimming his queer old lantern wick.

And then she is told, when the wind is high.

To take out a broom and to sweep the sky.

And the twinkling stars wouldn't shine as bright

If Anne did not give them a rub each night.

None of her friends have ever seen Anne Elizabeth Emily Green,

But an old astronomer one clear day Saw her scrubbing the Milky way.

—Shella E. Braine.

Came Near It.

A New England farmer was once describing in the presence of a very humane person the great age and debility of a horse that he formerly owned and used. "You ought to have killed him," interrupted the humane person indignantly. "Well," drawled the farmer, "we did—almost."

A Mean Dig.

Myrtle—Look what a lovely diamond engagement ring George has given me.
Estelle—Yes; it's lovely. It nearly broke my heart when I sent it back to him.

beer, mutton or rowl once a day is a large meat allowance for a child who is old enough for such foods. The fresh, green vegetables are most wholesome.

Cut down on potatoes in hot weather and always serve them baked or mashed without rich gravy. Soups or broths (all fat removed), with rice and finely cut or chopped vegetables, are especially nourishing. Clam bouillon, too, that comes prepared is a very good addition to the child's menu. An egg once a day, soft boiled or dropped on toast or rice, is a satisfying meal.

All the simple dishes, like bread and cracker puddings, soft custard, blanchmange and the gelatin desserts, are digestible and nourishing. Children easily learn good food habits, and the things they best love fortunately answer the summer requirements for a diet that is cooling, palatable and satisfying.

Milk is, of course, the summer food staple, but mothers need to remember that it is a hearty food in itself and not a beverage to be used as water to satisfy thirst and added to a full meal. For the incessant demand for "a drink" give pure cool water that is not ice cold and give it between meals.

Teach the children that a few sips slowly taken will quench thirst better than a whole glass of water hastily swallowed. With cereals, blanchmange and bread, milk makes a nourishing meal. One of the best lunches on a hot day is a beaten egg in a glass of cooled cocoa. The egg lemonade and orangeade are nourishing food drinks also.

When the King of Rome Cried.

Many mothers might take a lesson to heart from the following incident, narrated by one of Napoleon's biographers:

His little son, the famous king of Rome—L'Aiglon, whom Maude Adams portrayed as a young boy a few years ago—was hardly more than a baby. He was in charge of a lady of high birth, who acted as his governess. In addition to gentle birth this woman possessed a true love and thorough sympathy for children. She understood the little king of Rome as nobody else did, and in return for her affection and kindness he grew very fond of her.

One day he began to cry, pettishly and rebelliously, and would not stop. The lady ordered the windows closed, the curtains drawn and the candles lighted.

The child looked on in wonder. "What are you doing?" he finally asked.

"I am closing the windows so that the people of France will not know that their little prince cries," said the lady.

The little prince ran to her impulsively. "A thousand pardons, madame," he said in the formal words in which he had been taught. And he forthwith stopped crying.

His governess understood that an appeal to a child's sense of honor will have more effect than all the scolding or reasoning in the world. Most mothers, although their children are not princes, could at least suggest to their children that the neighbors in want of subjects would hear the crying. An appeal of this sort seldom fails, especially when drawn curtains and lights in the middle of the day have attracted the child's attention and taken his thoughts away from the cause of his sorrow.

NEW FALL BOOTS FOR MEN

We have just placed in stock several new models in the Great American Shoe, "THE REGAL." We are showing this famous line of shoe in Gunmetal, Patent and Tan Calf, on the New English last or the popular short vamp last, made with heavy or light soles in all sizes and widths. Prices are

Fire Near Odessa.

In a fire which broke out on Sunday night, a half a mile west of Odessa, a barn owned by James Denyes, and occupied by Albert Storms, was totally destroyed, together with a large quantity of hay. A horse owned by Mr. Storms was also burned to death. How the fire started is not known. The fire occurred about eight o'clock. The loss will amount to \$500, and it is understood that there is no insurance. Mr. Storms was in Kingston, at the time of the fire, attending the Free Methodist Church. His children who were left in charge of the place, were not at home, at the time of the fire. Mr. Storms had one load of hay already to take to Kingston, and this was destroyed with the rest of the hay.

Bell—Switzer.

Sydenham Street Methodist Church Kingston, was the scene of a quiet wedding on Monday, September 1st, 1913, where Miss Olive E. Switzer, only daughter of Mr. and Mrs. E. B. Switzer, Switzer, was united in the bonds of holy matrimony to Mr. J. S. Bell, Moscow. The ceremony was performed by Rev. A. Brown. Mr. and Mrs. Bell left by steamer for Montreal and Quebec.

Eastman Kodaks and Supplies.

In Napanee the genuine Eastman Kodak and Brownie Cameras can be procured only at Wallace's Drug Store, Limited. Send us your mail orders for films, Velox paper, acid fixing M. Q. powders, etc. All photo goods strictly net cash with the order. When sending rolls to be developed and printed, be sure to enclose the money or stamps. We will refund any balance. T. B. Mrs. Howard will resume her teaching of music, vocal, instrumental and theory, at the Presbyterian Manse. Apply for terms and the hour of lessons. 39-b

Miss Ora Smith, youngest daughter of Mr. and Mrs. Robert Smith, South Napanee, was married in Saskatoon, on August 30th, to Bruce Wagar, formerly of Napanee. Mr. and Mrs. Wagar will take up residence in the west, where the groom is a prosperous farmer.

The regular meeting of the W.C.T. U. will be held in the Library Board Room on Tuesday, the 9th Sept., at three o'clock. The members are requested to be present. All ladies interested in temperance work will be welcome.

Mrs. E. VanLuvén, Sec.

A wedding of interest to Napaneeans took place on Sept. 1st, when Arthur Daly, eldest son of Mr. and Mrs. Dennis Daly, Napanee, was married in London, Eng., to Miss Katherine E. Cullen, of Toronto. Mr. and Mrs. Daly will after a honeymoon, reside in Toronto.

On Friday night, Mrs. Thomas Connell, who has been ailing for the past three months, died in the Kingston general hospital. Her home was at Roblin where the remains were taken on Saturday morning. Deceased leaves a husband and three children.

It is said that on Sunday last between twenty and twenty-five young fellows from Belleville paid Napanee a visit and that they all arrived in town by way of the "bumper" route. What do you know about that? Is it any wonder that quite frequently some of them get nipped and loose a leg or an arm.

Town debentures to the amount of \$31,000 have been sold to the Oddfellows' Relief Association of Canada. They are five and a half per cent bonds and the price realized was 92½. Some few weeks ago this same corporation wanted an option on this lot of debentures, stating they might place them at 95, but some of the "wise ones" at the council board blocked the granting of the option asked. The difference between these two figures quoted means quite an amount of money, and it is now up to them to explain their action. Figure it out Mr. Ratepayer and see how much money the town lost by this deal.

Make the cows give more milk by using Texas Fly oil. You get it at The Medical Hall—Fred L. Hooper.

JAS. GORDON.

School Openings.

The public schools and the Collegiate Institute opened on Tuesday after the summer vacation. The teaching staff of the Collegiate is as follows: G. V. McLean, M.A., Principal; Miss Dickey, Miss Moir, W. B. Taylor, E. J. Corkhill, J. B. Symington, with Mr. G. B. Curran, B.S.A., as agricultural instructor. The teachers in the public schools are the same as heretofore with the exception that Mr. Wm. McKay, of Uxbridge, takes the place of Mr. Tice as principal of the West Ward school.

McGreer—Bathgate.

The Winnipeg Free Press, of August 25th, contains the following notice of a social event announcing the marriage of Dr. Charles Grange McGreer, a former Napanee boy: A quiet wedding was solemnized at four o'clock on Saturday afternoon, Aug. 23, 1913, at the home of Mrs. Bathgate, Balmoral Place, when her eldest daughter, Elizabeth Loughrin, was united in marriage to Dr. Charles Grange McGreer. Rev. Dr. DuVal officiating. Only the immediate relatives were present. The bride, who was unattended, was given away by her brother Mr. J. L. Bathgate, and wore her travelling suit of blue corded silk, with a French hat to match. Dr. and Mrs. McGreer left on the five o'clock train for a short honeymoon in the south.

Make Your Exhibition Reservations Early.

Intending visitors to the Toronto Exhibition are advised to make their reservations as early as possible so as to avoid delay and possible disappointment in view of the heavy travel at that time. For the accommodation of Exhibition visitors the Canadian Northern Ontario Railway will operate a special train daily except Sunday, August 25th, to September 6th inclusive, between Napanee and Toronto. The equipment will consist of high back first class coaches, parlor cars and dining car service will be given on the westbound trip. This train connects with the Bay of Quinte trains from Tweed and Sydenham and will leave Napanee at 9.50 a.m., arriving Toronto 2.20 p.m., returning leaves Toronto 8.00 p.m., arriving Napanee 12.30 a.m. Regular trains leave Napanee at 5.45 a.m. and 4.10 p.m., return leave Toronto 9.30 a.m., and 5.40 p.m. Dining and parlor cars are operated on all regular trains between Napanee and Toronto. Apply to local C. N. O. or B. of Q. Ry. Agent for further information regarding reduced rates and train service, and ask for an Exhibition Time Table Folder showing a map of the Exhibition Grounds. 37-d

TRINITY METHODIST CHURCH

Rev. S. Sellery, M.A., B.D., Pastor.
The pastor will conduct both ser-
vices.
9.45—Class meeting.
10.30—Topic, "Zeal."
11.45—Sunday School and Bible
Classes.
7 p.m.—Topic, "The insanity of sin."
Choice music at both services.
Prayer meeting on Wednesday
evening at 8 o'clock.
A cordial welcome to all the services.

Mrs. (Dr.) Charles Wilson, after a
most enjoyable visit with friends at
Hadden's Point, Bancroft, and Wel-
lington, has returned to her home on
Robert street.

Mrs. W. B. Taylor will receive at
her home, corner of Robert and
Graham streets, on Wednesday, Sept.
10th, from 4 to 6.

The many friends of Mr. W. P.
Deroche will be pleased to learn that
he is slowly recovering from his
serious burns caused by the explosion
of gas in the vault at his office last
week.

Judge Price was at Tamworth and
Enterprise on Tuesday presiding at
sittings of division court.

Miss Emma VanLaven, who has
been attending the Ontario College of
Art in Toronto this summer, was
successful in passing her examina-
tions.

Mrs. M. Getty and son, Master
Douglas, returned to her home at
Alton, Ill., on Wednesday, after an
extended visit with her mother, Mrs.
Walter Coxall, Mill street.

Mr. and Mrs. P. Perigo, of Water-
town, were guests of Mr. and Mrs. A.
Caton a few days this week. They
returned home on Thursday.

Mr. and Mrs. M. S. Madole are
spending the week in Toronto and
Niagara Falls.

Mr. and Mrs. W. A. Grange and
Miss Helen Grange returned on Mon-
day from a trip down the St. Lawrence
river to Montreal and Quebec.

Mrs. C. M. Warner and Miss Eliza-
beth Warner returned on Monday
after having spent five weeks in
Providence, R. I., and vicinity.

Mrs. F. S. Wartman left Thursday
to spend a couple of months with her
daughter in Saskatoon.

T. G. Carscallen, M.P.P., and Mrs.
Carscallen, returned home on Wed-
nesday after a pleasant visit at
Dresden and Port Lambton.

Miss Nettie Preston leaves to-day
for Pueblo, Col., after spending the
holidays with her parents.

Hiram Walker, and wife, Wilton,
have returned from Windsor, where
they attended the wedding of their
granddaughter and also visited friends
in Detroit and other places in the
west.

We regret to have to have to report
the serious illness of Mr. Harvey
Warner. He seemed to be in his
usual good health on Sunday and was
out driving when he was attacked
with a weak spell and had to be help-
ed to his home. Since that time he
has been suffering considerably but
we are pleased to be able to state, as
we go to press, that his condition
shows a slight improvement.

J. W. Hall left Tuesday for a
month's visit with friends in the west.
Miss Elsie Eyvel returned to New
York on Thursday after spending a
month's vacation the guest of her
brother, Mr. C. D. Eyvel, and other
relatives.

Mr. Vernon Campbell, of Rochester,
N. Y., is visiting his parents, Mr. and
Mrs. A. Campbell, Croydon.

Carter's Little Liver Pills, 15c.

SPRING 1913

We are pleased to announce that
we have been appointed sole repre-
sentatives in Napanee for the House
of Hobberlin, tailors to the Canadian
gentleman. This firm we have been
informed employs a most skillful and
artistic designer to whom they pay
the modest sum of \$8000 per annum.
Their sample outfit is the most elabo-
rate we have ever seen from any
house doing a special order business.
We KNOW their Cloths are of a high
order and the range embraces every
line that a good dresser could desire.
They absolutely guarantee every gar-
ment they turn out to be perfect in
fit and workmanship. Money back
if not satisfactory, and no grumbling.
What more could any man ask. We
would be delighted to show their
range of samples to any man con-
templating the purchase of a new
suit. If you order and the garments
are not entirely satisfactory to YOU
it will cost you nothing whatever but
the time you spent in making your
selection. We know of no fairer
way of doing business.

Samples are now ready for inspec-
tion at

A. E. Lazier's

DEATHS.

CONNELL—At the Kingston General
Hospital, on Friday, August 29th,
